Annual adjustment of New Zealand superannuation

15 Annual adjustment of rates

(1) In this section,—

Consumers Price Index (all groups) means the Consumers Price Index (all groups) published by Statistics New Zealand or, if that index ceases to be published, any measure certified by the Government Statistician as being equivalent to that index

standard tax means the amount of tax reckoned on a weekly basis that would be deductible in accordance with the tax code “M” stated in schedule 5, part A, clause 4, table row 1 of the Tax Administration Act 1994.

(2) Subject to subsection (3), the rates of New Zealand superannuation stated in clause 1 of Part 1 of Schedule 1, and clause 1(b) of Part 2 of that schedule, must be adjusted, by Order in Council, as at 1 April each year so that in each case the new rate (after the deduction of standard tax) is the rate at that date (after the deduction of standard tax and before the adjustment under this section is made) adjusted by any percentage movement upwards in the Consumers Price Index (all groups) between the Consumers Price Index (all groups) for the quarter ended with 31 December one year before the immediately preceding 31 December and the Consumers Price Index (all groups) for the quarter ended with the immediately preceding 31 December.

(2A) The adjustments (by any percentage movement upwards in the Consumers Price Index (all groups)) required under subsection (2) as at 1 April in any year from 2011 to 2021 (inclusive) must, despite subsections (1) and (2), be calculated,—

- (a) if, and insofar as, they relate to movements during quarters that end before 29 April 2010, using index numbers for those quarters of the Consumers Price Index (all groups); and
 - (b) if, and insofar as, they relate to movements during quarters that end after 28 April 2010, using index numbers for those quarters of the Consumers Price Index (less cigarettes and tobacco subgroup) published by Statistics New Zealand or, if that index ceases to be published, any measure certified by the Government Statistician as being equivalent to that index.
- (3) Every Order in Council made under subsection (2) must adjust the rates of New Zealand superannuation, subject to subsection (4),—
 - (a) so that the weekly amounts referred to in section 16 are set in accordance with that section; and
 - (b) so that the rate of New Zealand superannuation specified in clause 1(b) of Part 2 of Schedule 1 preserves its proportional relationship (after the deduction of standard tax) to the rates specified in clause 1 of Part 1 of that schedule.
- (4) An adjustment under this section must not reduce the weekly amounts payable under this section.
- (5) Every Order in Council made under subsection (2) has the force of law as if it was enacted by this Act.
- (6) Every Order in Council made under subsection (2) comes into force or is considered to come into force on 1 April of the calendar year in which it is made, and applies to New Zealand superannuation payable on and after that date.
- (7) *See* section 452 of the Social Security Act 2018, under which rates of New Zealand superannuation may be adjusted by Order in Council (including rates not required to be adjusted under this section).

 - (a) is secondary legislation (*see* Part 3 of the Legislation Act 2019 for publication requirements); and
 - (b) comes into force in accordance with subsection (6), even if it is not yet published.
- (9) An order under subsection (2) must be confirmed by an Act (*see* subpart 3 of Part 5 of the Legislation Act 2019).

43 Amount of required annual capital contribution

The required annual capital contribution for each financial year is—

$$a \div 100 \times \text{that year's GDP} - b$$

where—

a is the percentage of that year's GDP that, if the same percentage of the GDP that is projected for each of the next 40 years were contributed (by way of either or both of annual required capital contributions and annual expense payments under section 45) each year for the next 40 years, would be just sufficient, taking into account the Fund balance at the start of that year and projected Fund investment income over the next 40 years, to enable the Fund to meet the expected net cost of the New Zealand superannuation entitlements payable out of the Fund over the next 40 years

GDP is the projected annual gross domestic product of New Zealand

b is the expected net cost of the New Zealand superannuation entitlements payable out of the Fund in the year

net cost is the cost of New Zealand superannuation entitlements net of any amount of tax deducted or withheld, or required to be deducted or withheld under the PAYE rules in the Income Tax Act 2007

next 40 years means the financial year for which the required annual capital contribution is being calculated plus each of the following 39 financial years.

Section 43 formula item net cost: amended, on 1 April 2008 (effective for 2008–09 income year and later income years, except when the context requires otherwise), by section ZA 2(1) of the Income Tax Act 2007 (2007 No 97).

 - (c) a statement of the reasons for the Government's departure from the required annual capital contribution; and
 - (d) a statement of the Government's intentions regarding future contributions to the Fund; and
 - (e) a statement of the approach the Government intends to take to ensure that the Fund will be sufficient to meet the payments of New Zealand superannuation entitlements expected to be made over the next 40-year period.
- (2) The requirements of this section do not apply if the required annual capital contribution is less than zero.

Section 44(1): amended, on 25 January 2005, by section 37(1) of the Public Finance Amendment Act 2004 (2004 No 113).
