

Imprest Supply (Second for 2000/01) Bill 2000

Government Bill

Explanatory note

General policy statement

Imprest supply is the statutory mechanism that allows Parliament to provide the Government with the authority to spend public money and to incur expenses and liabilities in advance of appropriation by way of an Appropriation Act.

The Imprest Supply (First for 2000/01) Act 2000 provides the sole financial authority from the start of the 2000/01 year until the Appropriation (2000/01 Estimates) Bill is passed. In contrast, the Imprest Supply (Second for 2000/01) Bill seeks financial authority additional to that sought in the Appropriation (2000/01 Estimates) Bill.

This Bill is required to ensure that the Government has sufficient supply to implement decisions taken after the 2000/01 Estimates were finalised and to meet any increases in demand-driven expenses or other risks or contingencies in excess of the amounts provided in the Appropriation (2000/01 Estimates) Bill.

The amounts this Bill seeks are intended to be sufficient to provide supply until the Appropriation (2000/01 Supplementary Estimates) Bill is passed for the spending of public money and the incurring of expenses and liabilities in excess of the amounts appropriated in the Appropriation (2000/01 Estimates) Bill.

Imprest is calculated separately for public money, expenses, and liabilities.

Imprest sought for public money in this Bill covers the appropriation type capital contributions to departments.

Imprest sought for expenses in this Bill covers the following appropriation types:

- departmental and non-departmental classes of outputs:
- benefits and other unrequited expenses:
- borrowing expenses:
- departmental and non-departmental other expenses.

Imprest sought for liabilities in this Bill covers the following appropriation types:

- non-departmental capital contributions:
- purchase of development of capital assets by the Crown.

Clause by clause analysis

Clause 1 is the Title clause.

Clause 2 is the commencement clause. The Bill comes into force on the day after the date on which it receives the Royal assent.

Clause 3 provides that the Bill expires on the coming into force of the second Appropriation Act for 2000/01 (the Appropriation (2000/01 Supplementary Estimates) Act 2001).

Clause 4 states that the purpose of the Bill is to authorise the Crown to spend public money and incur expenses and liabilities during the 2000/01 financial year in advance of appropriation by way of an Appropriation Act.

Clause 5 defines certain terms used in the Bill.

Clauses 6, 7, and 8 are the main clauses in the Bill.

Clause 6 seeks authority to spend \$200 million of public money in advance of appropriation. The authority sought for public money contains a general contingency provision to ensure supply in the event of unforeseen risks eventuating.

Clause 7 seeks authority to incur expenses of \$1,500 million in advance of appropriation. The main components are—

- Cabinet decisions after the 2000/01 Budget:
- potential risks to the 2000/01 Budget contingency:
- provision for increases in appropriations relating to fiscally neutral transfers. These require an appropriation and Imprest Supply authority but are matched by decreases in other items.

They do not affect the operating balance. A significant proportion of the \$1,500 million sought for expenses is related to fiscally neutral transfers that may be required to effect restructuring in the health sector and fiscally neutral transfers that may be required for Votes Defence Force, Police, and Economic Development:

- a contingency provision for unforeseen expenses and increases in demand-driven items such as social welfare benefits and education purchases.

Clause 8 seeks authority to incur liabilities of \$1,250 million in advance of appropriation. The authority sought for liabilities includes—

- a sum expected to be in the region of \$760 million in Votes Finance and Health associated with the potential refinancing of private sector debt to public sector debt and the transfer of appropriations between Votes:
- capital appropriations for Vote Defence in the region of \$180 million to begin acquisition of Light Armoured Vehicles and tactical communications equipment.

The authority sought for liabilities for capital transactions also contains a general contingency provision to ensure continuous supply in the event of unforeseen risks eventuating.

Clause 9 specifies that all public money spent, and expenses and liabilities incurred, under *clauses 6, 7, and 8* must be charged against appropriations in an Appropriation Act for the 2000/01 year. Appropriations for amounts included in this Bill will be sought in the Appropriation (2000/01 Supplementary Estimates) Bill.
