EXPLANATORY NOTE

Clause 14B: Section 15 of the Dairy Industry Act 1952 includes provisions making it unlawful to mix with or add to or use in the manufacture of dairy produce any extraneous ingredient except pure sugar, common salt, or any harmless coagulative, preservative, or colouring ingredient. This clause provides that, with the prior consent of the Director-General of Agriculture, there may be mixed with or added to or used in the manufacture of dairy produce any extraneous ingredient not at present permitted by section 15, but the product must be clearly designated by a name or description approved by the Director-General which does not include any of the names butter or cheese or condensed milk or dried milk or casein or any similar name, and any package or container containing the product must be clearly labelled with the approved name or description of the product.

Clause 21B: By section 9 of the Geothermal Energy Act 1953 a licence for the use of geothermal energy need not be obtained where a bore was in actual use at the commencement of the Act. The effect of this amendment is that a licence need not be obtained for a bore that had been used at any time before the commencement of the principal Act but was not in use on that date.
