By-laws under the Rotorua Borough Act, 1922.

WHEREAS by section 8 of the Rotorua Borough Act, 1922, the council and owners of public light and power for supply of electrical energy to the Borough of Rotorua is vested in the Department of Tourist and Health Resorts, as incorporated by the Rotorua Town Act, 1922, and the Rotorua Borough Act, 1922; and whereas in respect of such works the said Department has the power for the time being conferred by law on Borough Councillors, except the power to borrow money or make and levy any special rate; and whereas by license granted by the Governor-General in Council as published in the New Zealand Gazette of the 5th November, 1931, and 1st October, 1936, the said Department is authorized to generate electricity and erect electric lines within the Borough of Rotorua and portion of the County of Rotorua as set out in the Schedules to the said licenses:

NOW, therefore, the said Department, in pursuance of such powers and all other powers hereinunto enabling it, doth hereby revoke By-laws No. 30 and 35 of the by-laws published in the New Zealand Gazette of the 18th February, 1937, and substitutes the following By-laws:—

BY-LAW 30.

If the Department should discontinue the supply to a consumer for any of the reasons set out in By-law No. 30, or if an installation is disconnected at the request of the consumer for any reason other than a change of tenancy, then a payment of $5 shall be made for the reconnection of such installation, together with reasonable travelling expenses if incurred by the Department in the case of installations outside the Borough of Rotorua.

BY-LAW 35.

The price for electrical energy supplied by the Department will be calculated on the Board of Trade unit consisting of 1,000 watt-hours. All energy will be charged according to meter-register, but should a supply be given before a meter is installed the consumer shall pay for current supplied during such period a sum based on the number and capacity of lamps and other apparatus installed.

In all cases units may, at the option of the Department, be measured as kilowatt-hours instead of kilowatt-hours if the power factor of the consumer's load falls below 90 per cent.

Should the meter prove defective in any way, or be removed for testing or repair, the consumer shall pay per month for energy supplied during such period a sum based on the average former reading of the meter.

If the revenue from any existing or proposed installation does not cover the cost of supply, the Department may impose a connected-load charge in addition to the charge by meter.

Prepayment meters may be installed in any installation at the discretion of the Department.

The Department may read meters monthly or quarterly or at any other interval that best suits its convenience. Should a special reading be required at any time to suit the convenience of the consumer, such reading will be made and a bill will be forwarded to the consumer.

BY-LAW 36.

In cases where the previous account or accounts have been assessed in accordance with the preceding paragraph, the Department on receiving a reading of the meter, may compute the consumption on the basis that the consumer has been in occupation for the whole or part of the period from the date of the last actual reading. Such computation shall not, however, prejudice the right of the consumer to certify that the premises were occupied for a greater or lesser period than that assessed by the Department. On receiving such a certificate the Department will adjust the account accordingly, provided the periods when the premises were unoccupied exceed one month continuously.

The charges for energy supplied shall be computed monthly, and shall be as follows:—

(1) Lighting—:

<tr>

<th>Rate per Unit</th>

<tbody>
<tr>
<td>1-280</td>

</tr>
</tbody>
</table>

(2) Where prepayment meters are installed the charge shall be 4d. per unit for lighting and 11d. per unit for domestic heating and cooking purposes. This rate will be operative from the date the new price mechanisms are installed.
(3) For motor cars, or similar installations, the following adverse tariff is available. Where not less than ten (10) prepayment meters are installed in the same installation, for supply to heating appliances only, the charge shall be 1d. per unit with an average minimum charge of £2 per meter per annum.

A minimum may be required where these meters are installed, as provided for in clause 35 (g).

Neon lighting or similar continuous...

Metal filament lighting...

(c) (1) For domestic heating, power, and electrical appliances and supply of a similar nature:

1–48 units
Balance units

Churches shall be included under this scale.

(2) When the consumer installs an electric cooking range the charge for all the energy consumed by such range during the six months immediately following its installation shall be 1d. per unit.

At the expiry of the six-months period energy supplied for the range will be charged as per scale (c) (1).

(3) Where in domestic installations supply is given to all three through one meter, or the supply is given through separate meters, the readings of these meters may be combined and the consumption shall be charged per the following scale:—
