* For full details of limits see below.

“Luminous-discharge tubes” means—

The following work in connection with luminous-discharge tube and associated equipment only—

- (a) All work over 650 volts;
- (b) The replacement of fuse-links;
- (c) The connection and replacement of flexible cords;
- (d) The earthing of such equipment;
- (e) The connection of such equipment to the fixed wiring;
- (f) The disconnection of such equipment from the fixed wiring;
- (g) The assembly and repair of such equipment.

“Motion and sound pictures” means—

- (a) The replacement of subcircuit fuse-links; and
- (b) The following work in connection with sound-film equipment only—
 - (i) The adjustment and/or replacement of component parts in the sound system from the power transformer to the output; and
 - (ii) The adjustment and/or replacement of fractional horse-power motors and control equipment for projector drives, arcs, rewinding, exhaust as applied to lamp-house ventilation, rectifier cooling system, gramophone records, the curtain, and for the lighting effects; and
 - (iii) Servicing rectifiers used in connection with supply to an arc; and
 - (iv) The adjustment and/or replacement of a change-over mechanism; and
 - (v) Servicing the direct current side of the motor-generator used in connection with supply to an arc; and
- (c) Servicing theatre emergency lighting.

“Radio experimenter” means—

The following work in connection with amateur radio experimental work only—

- (a) The replacement of fuse-links;
- (b) The connection and replacement of flexible cords;
- (c) The earthing of radio sets;
- (d) The disconnection and reconnection of radio sets;
- (e) The assembly and repair of radio sets.

“Radio sets” means—

- (a) The installation and connection of any earthing conductor used for any radio apparatus;
- (b) The connection of a flexible cord to any radio apparatus or any plug-top, ceiling-rose, or other connector used between the fixed wiring and such apparatus;
- (c) The replacement of any flexible cord used for supplying electrical energy to any radio apparatus and used between the fixed wiring and such apparatus;
- (d) The replacement of a fuse-link on any subcircuit used to supply electrical energy to any radio apparatus;
- (e) The removal and/or replacement of any radio apparatus as a whole or in part and which is connected to the fixed wiring by means of a flexible cord;
- (f) The assembly, alteration, and/or repair of any radio apparatus.

“Secondary of radio sets” means—

Work on the secondary side of the power transformer of radio sets.

“Serviceman” means—

- (a) The installation, connection, alteration, removal, or repair of an overhead line (whether in conduit or otherwise) up to the point of entry in the external wall of a consumer's building; and
- (b) The installation, connection, alteration, removal, or repair of an underground line up to a service cut-out within a consumer's building; and
- (c) The erection or removal of meters or time-switches, the replacement of fuse-links and defective flexible cords, the removal and replacement of defective accessories, apparatus, and appliances, and the minor adjustments of defective accessories, apparatus, and appliances; and
- (d) The assisting of a registered electrical wireman to replace defective conductors between the main switchboard on a consumer's premises and the service-line from which supply is obtained, when no apprentice, improver, or other registered electrical wireman is available.
