

*Economic Stabilization Emergency Regulations 1942.—Wartime Price Index*

**I**N accordance with Regulation 41 of the Economic Stabilization Emergency Regulations 1942, it is hereby notified that the wartime price index as at the 15th day of September, 1944 (on base: 15th December, 1942 = 1000), was 1003. This figure indicates that, after seasonal adjustment has been made in respect of certain commodities the prices of which are subject to seasonal movement, the general level of prices of commodities, &c., included in the wartime price index was 0·3 per cent. higher at 15th September, 1944, than at 15th December, 1942.

Term of Agreement: Four years, with the right to purchase biennially thereafter for a period of sixteen years a quantity of forest-produce either in the form of logs or trees.

Upon the expiry of the four-year term of the sale agreement, during which the Commissioner of State Forests (hereinafter referred to as "the Commissioner") undertakes to supply logs, the purchaser shall have the right to purchase biennially during the subsequent sixteen-year period provided herein, at such prices as the Commissioner may determine, forest-produce either in the form of logs or trees as the Commissioner may decide not less in quantity than the biennial average quantity purchased during the said four-year term.

The prices to be charged in respect of the biennial sales herein provided shall be determined as far as possible to make them conform to the then current values of sown produce, provided always that values do not fall below the cost of logging plus the following stumpage rates per cubic foot, viz.:—

|                  |    |    |      |
|------------------|----|----|------|
| Rimu and miro .. | .. | .. | 2½d. |

| Kahikatea ..     | .. | .. | 2d.  |
| Totara ..        | .. | .. | 4½d. |

**Deposit and Terms of Payment**

As a guarantee of good faith a marked cheque to yield the sum of £1,000 (one thousand pounds) must accompany the tender, and shall be returned if the tender is not accepted. In the case of the purchaser this sum shall be held by the Conservator of Forests, Rotorua (hereinafter called "the Conservator"), and may at his option be returned to the purchaser at the conclusion of milling operations, or may be used in payment for the last month's supply of logs, any surplus being returned to the purchaser.

In addition, the purchaser shall, within 28 (twenty-eight) days of notification of the acceptance of his tender, deposit with the Conservator further sureties to the value of £2,000 (two thousand pounds), which shall be held by the Crown as security against default in payment for the logs purchased as herein provided or failure to comply with the terms and conditions of the sale agreement or any subsequent license or agreement. Should payment be made regularly, and should the terms and conditions hereinafter set out be faithfully observed, the sureties shall be returned to the purchaser at the conclusion of milling operations. The sureties may be by marked cheque, inscribed stock, Government bonds, or in other form acceptable to the Commissioner.

The deposit and the sureties (if in cash) will be invested in an approved security, and the accrued interest will be paid to the purchaser from time to time.

(NOTE.—It is estimated that the capital necessary to finance this project successfully will be not less than £40,000.)

**Measurement of Logs**

Logs will be measured by officers of the State Forest Service, and the quantities of timber in cubic feet will be assessed from the measurement made on each log of its girth at mid-length outside bark to the nearest complete inch, fractions being omitted, and its length to the nearest complete foot, odd inches being omitted, the volume being calculated in accordance with the New Zealand State Forest Service Log Scale. Although logs will be delivered in the longest possible lengths suitable for transporting, the maximum log length for measurement purposes will be 24 (twenty-four) ft., and longer lengths will be calculated as two or more separate logs of approximately equal length, save that no butt logs will be measured at a point less than 7 ft. from the butt end.

An allowance of 4 in. for crosscutting will be made on logs ranging from 24 (twenty-four) ft. to 32 (thirty-two) ft. in length, and on account of each complete 16 (sixteen) foot log length obtainable from logs of a length of 33 (thirty-three) ft. or over; and the Forest Officer will make such deductions for defective logs as in his opinion are reasonable, and in cases of dispute the Conservator's decision shall be final.
