Measurement of Logs

Logs will be measured by officers of the State Forest Service, and the quantities of timber in cubic feet will be assessed from the measurement made on each log of its girth at mid-length outside bark to the length of inches being omitted, and from the length to the nearest complete foot, odd inches being omitted, the volume being calculated in accordance with the New Zealand State Forest Log Scale. Although logs will be delivered in the longest possible lengths suitable for transporting, the maximum log length for the purposes will be 24 (twenty-four) ft., and longer lengths will be calculated as two or more separate lengths of approximately equal length, except that no butt logs will be measured shorter than 7 ft. from the butt end.

An allowance of 4 in. for, cross-cutting will be made on logs ranging from 24 (twenty-four) ft. to 32 (thirty-two) ft. in length, and from 32 (thirty-two) ft. to 40 (forty) ft. (each complete foot) foot log-lengths will be calculated as obtained from logs of a length of 33 (thirty-three) ft. or over.

The Forest Officer will make such deductions for defective logs as in his opinion are reasonable, and in case of dispute the Conservator’s decision will be final.

Terms and Conditions

1. The sale will be made in accordance with the provisions of the Forests Act, 1921-22, the regulations in force thereunder, and the consent of the Conservator and is usual in log sales of this nature made by the State Conservator.

2. The State Forest Service will deliver on to the mill skids or log storage sites (the position of which will be notified from time to time) sufficient logs during each four-weekly period to average per working-day in the forest not less than 800 cubic feet and not more than 1,100 cubic feet, and the purchaser shall accept delivery of all logs so supplied.

3. The Conservator will supply delivery dockets showing all measurements of logs as they are delivered, and at the end of each four-weekly period the Conservator will furnish the purchaser with a summary of volume of logs in each species and class delivered during the period and the total amounts due therefor.

4. After the delivery of a log is completed the purchaser shall be liable for full payment therefor, notwithstanding that the log may subsequently be damaged by fire, insect, fungal attack, or any other cause.

5. Should the purchaser at any time make default in any of the payments due under the sale or in any manner in connection therewith, the Conservator shall have in addition to other remedies the right to cease delivery of logs until such payments have been met to his satisfaction.

6. The purchaser, his agents, servants, employees, or contractors shall not be permitted to enter the State Forest at other than the open areas in the vicinity of the mill without the written consent of a Forest Officer and upon such conditions as such officer may impose.

7. All dwellings to be erected shall be of suitable material with necessary buildings on a site which may be leased from the Conservator, or, alternatively, on a site to be approved by the Conservator.

8. The purchaser shall base to the purchaser sites for the erection of dwellings within a proposed village settlement, but the number of dwellings shall be subject to agreement with the Conservator and the general layout and sites of all such dwellings shall conform to a plan which may be obtained from the office of the Conservator.

9. The type and design of the equipment, buildings, and dwellings to be erected shall be subject to the approval of the Conservator, and each tenderer shall submit with his tender a preliminary draft plans and specifications of the sawmill and other buildings.

10. The purchaser shall, within 8 (eight) weeks of the date on which the purchaser is notified of the acceptance of his tender, forward to the Conservator approval final plans and specifications of all such buildings and dwellings, and shall not proceed with the erection of any building or dwellings without such approval, nor shall he be receiving such approval make any amendment to such plans or specifications without the consent of the Conservator.

11. The purchaser shall not sell or lease to the purchaser for the purpose of inspecting the cutting of logs and examining his D books or taking extracts therefrom for the purpose of verifying the contents of logs sold to him and the quantities of timber produced therefrom.

12. The attention of all tenderers is drawn to the fact that the local controlling authority may require the purchaser to pay any claims or charges which may be made by that body for the maintenance of the road over which the timber may be transported, and before the sale agreement is completed a letter indicating that satisfactory arrangements have been made in this connection must be produced to the Conservator.

13. Intending tenderers are expected to visit the locality and to satisfy themselves in every particular on all matters relative to the sale.

14. Each tenderer must state the price per cubic foot he is prepared to pay for each class of logs in each species. The highest price for any tender will not necessarily be accepted, and the lots described are submitted for sale subject to the final acceptance of the tender by the Commissioners.

15. The purchaser shall not be permitted to transfer, assign, or in any way part with the rights and privileges granted under the sale agreement, or any subsequent license or agreement, without the written consent of the Commissioners.

16. Tenders should be enclosed in envelopes addressed “Conservator of Forests, Auckland,” and endorsed “Tender for Timber.”

17. Except as provided in Conditions 7 and 8 hereof, nothing in the sale agreement, or any subsequent license or agreement, shall be construed or take effect to confer upon the purchaser the right to the possession of any land so as to create any leasehold estate or other interest thereon.

R. D. CAMPBELL, Conservator of Forests.
