Note.—At stations where departures from normal are in parentheses the record has been maintained for less than ten years in the case of temperatures and for less than twenty years in the case of rainfall and the normals are partly interpolated.

Notes on Weather for January, 1947

General.—For the fourth consecutive month the mean temperatures were below normal. Cool and rather unsettled conditions continued in the early part of the month. In the latter half, however, favourable weather and much warmer temperatures enabled considerable leeway to be made up in shearing, harvesting, and haymaking activities. In general, pastures were in good condition, although beginning to dry off rapidly towards the end of the month. Stock was reported to be doing well.

Akaroa (Onawe, Duvanche's Bay) to Ashburton received almost double the average, most of this falling between the 7th and 9th.
