(I.A. 103/5/121.)

By-laws under the Rotorua Borough Act, 1922

WHEREAS by section 8 of the Rotorua Borough Act, 1922, all electric light and power works theretofore provided, erected, or constructed by the Crown in or in connection with the Town of Rotorua remain vested in the Department of Tourist and Health Resorts, as incorporated by the Rotorua Town Act, 1907, and the Rotorua Borough Act, 1922:

And whereas in respect of these works the said Department has and may exercise all the powers for the time being conferred by law on Borough Councils, except the power to borrow money by way of special loan or to make and levy any rate:

And whereas by licences granted by the Governor-General in Council, as published in the *New Zealand Gazette* of the 5th November, 1931, and 1st October, 1936, respectively, the said Department is authorized to generate electricity and erect electric lines within the Borough of Rotorua and portion of the County of Rotorua as set out in the Schedules of the said licences:

Now, therefore, the said Department, in pursuance of the powers hereinbefore recited and all powers thereunto enabling it, doth hereby revoke By-law 35 made on the 26th day of January, 1944, and published in the *Gazette* on the 27th day of the same month at page 59, as amended by the Rotorua Borough By-laws published in the *Gazette* on the 9th day of October, 1947, at page 1438, and doth substitute the following by-law, and doth hereby declare that the instruments published in the *Gazette* of the 27th day of January, 1944, at page 59, and on the 9th day of October, 1947, at page 1438, as aforesaid, are consequentially revoked, and that this instrument shall take effect on and from the 7th day of September, 1948.

BY-LAW 35

The price for electrical energy supplied by the Department will be calculated on the Board of Trade unit consisting of 1,000 watt-hours. All energy will be charged according to meter-register; but should a supply be given before a meter is installed the consumer shall pay for current supplied during such period a sum based upon the number and capacity for lamps and other apparatus installed.

In all cases units may, at the option of the Department, be measured as kilovolt-ampere hours instead of kilowatt-hours if the power factor of the consumer's load falls below 90 per cent.

Should the meter prove defective in any way, or be removed for testing or repair, the consumer shall pay per month for energy supplied during such period a sum based on the average former reading of the meter.

If the revenue from any existing or proposed installation does not cover the cost of supply, the Department may impose a connected-load charge in addition to the charge by meter.

Prepayment meters may be installed in any installation at the discretion of the Department.

The Department may read meters monthly or quarterly or at any other interval that best suits its convenience. Should a special reading be required at any time to suit the convenience of the consumer, such reading will be made or a card will be forwarded on which the consumer can enter the reading of the meter or meters, and an account will be prepared from the readings on this card. A charge may be levied to cover the cost of the special readings as above.

Where premises are occupied intermittently and/or a reading of the meter is not obtained at the time of the ordinary meter-reading, a card may be left for or sent to the consumer. This card shall be filled in by the consumer and returned to the Department to enable an account to be prepared.

Failing the receipt of the card within a period of ten days, the Department will assume that the premises have been unoccupied for the last period between regular meter-readings and an account computed in accordance with Part (F) of this by-law will be forwarded to the consumer.

In cases where the previous account or accounts have been assessed in accordance with the preceding paragraph, the Department on receiving a reading of the meter may compute the consumption on the basis that the consumer has been in occupation for the whole or part of the period from the date of the last actual reading. Such computation shall not, however, prejudice the right of the consumer to certify that the premises were occupied for a greater or lesser period than that assessed by the Department. On receiving such a certificate the Department may adjust the account accordingly, provided the periods when the premises were unoccupied exceed one month continuously.

The charges for energy supplied shall be computed monthly, and shall be as follows:—

(A) DOMESTIC

(i) For domestic lighting, heating, and power the monthly charges shall be as follows:—

1-20 units	3d. per unit.
21-40 units	2d. „
Balance of units	1d. „
