Notice to Mariners No. 8 of 1949

Marine Department,

Radio-telephone Service for Ships

Change in Frequencies

Details: From midnight, 28th February, 1949, ships employing radio telephony will be required to use 2,182 kc/s when calling coast stations and to listen on that frequency for the reply. Traffic must be transmitted on the working frequency of 2,162 kc/s, wherever applicable.

The following is an example of the procedure to be adopted:
Ship station calls coast station on 2,182 kc/s—

"Hullo Wellington, Maimai calling, message for you, may I go ahead on 2,162 (2,012 kc/s where this frequency is used), over."

Coast station replies on 2,182 kc/s—

"Hullo Maimai, Wellington answering, go ahead on 2,162 (2,012 kc/s where applicable), over."

Ship station transmits traffic on working frequency—

"Hullo Wellington, Maimai calling, telegram begins."

It should be noted that although a ship is required to change to its working frequency for traffic handling, brief remarks indicating the ship's position, advice of leaving port, &c., may be made on 2,182 kc/s.

When a coast station wishes to communicate with a ship it will use the following procedure:

Coast station calls ship station on 2,182 kc/s—

"Hullo Alert, Awarua calling, message for you, over."

Ship station replies on 2,182 kc/s—

"Hullo Awarua, Alert answering, go ahead 2,162, over."

(The ship station should then listen on 2,162 kc/s for reception of traffic from the coast station.)
