BY-LAW 35—CHARGES

The price for electrical energy supplied by the Department will be calculated on the Board of Trade unit consisting of 1,000 watt-hours. All energy will be charged according to meter-register, but should a supply be given before a meter is installed the consumer shall pay for current supplied during such period a sum based upon the average former reading of the meter.

Should the meter prove defective in any way, or be removed for testing or repair, the consumer shall pay per month for energy supplied during such period a sum based upon the average former reading of the meter.

If the revenue from any existing or proposed installation does not cover the cost of supply, the Department may impose a connected-load charge in addition to the charge by meter.

Prepayment meters may be installed in any installation at the discretion of the Department.

The Department may read meters monthly or quarterly or at any other interval the consumer, on the basis that best suits its convenience. Should a special reading be required at any time to suit the convenience of the consumer, such reading will be made or a card will be forwarded on which the consumer can enter the reading of the meter or meters, and an account will be prepared for the readings on this card. A charge may be levied to cover the cost of Special readings as above.

Where for the reason that the premises are occupied intermittently or for any other reason a reading of the meter is not obtained at the time of the date of issue of a meter card, a memo card may be left for or sent to the consumer. This card shall be filled in by the consumer and returned to the Department for the establishment of an account.

Failing the receipt of the card within a period of ten days, the Department will assume that the premises have been unoccupied for the last period between meter-readings and an account computed in accordance with Part F of this by-law will be forward to the consumer.

In cases where the previous accounts or accounts have been assessed in accordance with the preceding paragraph, the Department on receiving a reading of the meter may compute the consumption on the basis that the consumer has been in occupation for the whole or part of the period from the date of the last actual reading. Such computation shall not, however, prejudice the right of the consumer to certify that the premises were occupied for a greater or lesser period than that assessed by the Department. On receiving such a certificate the Department may adjust the account accordingly, provided the periods when the premises were unoccupied exceed one month continuously.

The charges for energy supplied shall be computed monthly, and shall be in accordance with the following schedule:

Churches and Maori meeting-houses shall be included under this scale.
