8. The right to dig and excavate the soil of the said easement strip to such extent and depth as the Grantee shall deem to be necessary for the purpose of carrying out or performing any of the provisions of the said easements, provided however that on entering on to the easement strip for the purposes of constructing, reconstructing, repairing, or maintaining the stopbank and drain such work will be carried out and completed with as little disturbance to the surface of the easement strip as possible and on completion of such work the surface of the easement strip will be restored at the cost of the Grantee.

9. The right to remove any bridges over the stream or drain provided that such bridges are put back in the same state and condition as they were prior to removal, provided always that nothing herein contained or implied shall be deemed to compel the Grantee to convey or conduct water through the said open drains and/or pipes or concrete conduits nor deem to compel the Grantee to construct, reconstruct, alter, repair, or maintain a stopbank and the Grantee may discontinue such work at will and nothing herein contained or implied shall in any way limit or derogate from any powers, rights, privileges, or duties vested in or imposed upon the Grantee in its capacity as local authority having control or oversight over works of the nature of those hereinbefore described in any statute regulation or bylaw for the time being in force; and provided further that there shall be no claim either at law or equity against the Grantee for damage caused by flood waters due to any breach subsidence or because of the height or level of the stopbank or the soil or material slipping from the stopbank and the easement strip on to adjoining land.
