(a) The price payable by the company for all electrical power under the agreement shall be based on a yearly amount per kilowatt, calculated as provided in clause 12 hereof (hereinafter called "the yearly kilowatt price"). The company shall pay for the said electrical power on a quarterly basis.

(b) The company shall pay in respect of a quarter—

"(i) for all electrical power under the agreement (other than electrical power made available in pursuance of notices given by the company under the said paragraph (g) of clause 5 of the agreement), an amount equal to the sum of the notified kilowatt quarterly amounts (a "notified kilowatt quarterly amount" for the purpose of this subparagraph being, in respect of each of the notified kilowatts during a quarter, the proportion of the yearly kilowatt price equal to the proportion which the number of days in that quarter in respect of which the company is obliged to pay under the agreement for the notified kilowatt bears to the total number of days in the calendar year in which that quarter occurs); and

"(ii) for electrical power made available in pursuance of notices given by the company under the said paragraph (g), an amount equal to the product of the yearly kilowatt price multiplied by the number of kilowatts which bears the same proportion to 20000 as the quantity of energy available during that quarter (on the basis of the load factor of the electrical power required under the said notices) from the electrical power so made available, and for which the company is obliged to pay under the terms of the agreement during that quarter, bears to the quantity of energy available from two Crown blocks during the calendar year in which that quarter occurs.

(c) The Crown shall render an account to the company for the amount payable for electrical power under the agreement at the beginning of each calendar quarter in respect of the preceding quarter, and each account shall be payable within one month after it is received by the company at its office at Bluff, or elsewhere as may be agreed, at the New Zealand Electricity Department's office at Dunedin, or by lodgment to the Public Account at any branch in New Zealand of the Bank for New Zealand, followed by mailing of the bank's receipt for the amount so lodged to the said Department's office.

(d) In any case where immediately after the end of a particular quarter it is not possible to calculate accurately the yearly kilowatt price or the number of notified kilowatts because some or all of the components of either or both of them are not then known, a pro forma account shall be rendered in respect of that quarter with either or both (as the case may be) of the yearly kilowatt price and number of notified kilowatts estimated as accurately as is then possible, and the amount of the pro forma account shall be adjusted in the quarterly account next after all components are known. In the event of it being necessary to estimate the number of notified kilowatts because the exact number in any block of electrical power required by the company under a notice given pursuant to clause 5 of the agreement has not at the time been determined under clause 8 of the agreement, then the number of notified kilowatts in that block shall, for the purpose of the pro forma account, be estimated as the number of kilowatts required by that notice.
