The heads must not be further worked, except that a pilot hole may be drilled in the shank, such hole to be reamed and the shank to be tapered in New Zealand. NOTE—The importer of the shafts need not be the manufacturer of the heads. In manufacturing golf clubs, he must, however, use heads which have been manufactured in New Zealand, in accordance with the conditions set out in the decision: Approved: (a) Shafts of steel, whether in the black, polished, plated, coated with casein, or otherwise surfaced, but without any attachments of any kind; (b) Shafts of aluminium, whether polished, plated, coated with casein, or otherwise surfaced, but without attachments of any kind	Free	..	20%	10.8	171	1/8/69	30/6/74
