Delegates again attempting to force men into action over illegal levies. Suspended over weekend loss of wages.

Threats to Members: (Ralf Aggers) Holster Engineering. Delegates threatened this man who is over 60 on two occasions and member left job as he was scared.

Delegates Threatened: P. Pitman with fist: Same Delegate jumped over table after meeting and was about to hit T. Tolley; another delegate stepped between him and Tolley and stopped him.

Delegates Threatened: P. Sefo T.A.: and he even took Solicitors advice.

Not abiding Engineer's Union Rules: The continued refusal of delegates at meetings to abide by Rules and procedure of Engineer's Union. Such as refusal to hold Secret Ballots and adhere to rules set by National Council and set out in Shop Stewards Handbook. Delegates won't accept motions by Tradesmen.

Manager also been forced to apologise on ridiculous matter. This could happen to you! Foreman suspended for one week for wedging job for safety reasons.

MACHINE STRESS GRADING

(An alternative to visual grading of timber for strength)

By I. D. Whiteside

This book outlines the need for commercial machine stress grading in New Zealand.

Stress grading studies carried out by the writer in 1967 on radiata pine from Kaingaroa Forest showed that machine stress grading gave better grade recoveries over visual grading hence raised the value of a considerable proportion of the sawn output in framing sizes.

The writer firmly believes that the introduction of machine grading will hold overcome the present lack of stress grades in New Zealand. This lack of availability is thought to have been a major cause of timber not being much more widely used as a structural material in competition with concrete and steel.
An informative book for builders, building inspectors, and specifiers to prepare them for the introduction of machine stress graded timber.
