The Taranaki County Council Foreshore Control Order 1975

DENIS BLUNDELL, Governor-General
ORDER IN COUNCIL
At the Government House at Wellington this 8th day of September 1975
Present:

HIS EXCELLENCY THE GOVERNOR-GENERAL IN COUNCIL.

Pursuant to section 165 of the Harbours Act 1950, His Excellency the Governor-General, acting by and with the advice and consent of the Executive Council, hereby makes the following order.

ORDER

1. (a) This order may be cited as The Taranaki County Council Foreshore Control Order 1975.

(b) This order shall come into force on the date of its publication in the Gazette.

2. In this order—

"The Act" means the Harbours Act 1950;

"The Council" means the Taranaki County Council;

"Foreshore" means such parts of the bed, shore, or banks of a tidal water as are covered and uncovered by the flow and ebb of the tide at ordinary spring tides;

"Minister" means the Minister of Transport and includes any officer, person or authority acting by or under the direction or authority of the Minister.

3. There is hereby granted to the Council for a period of 21 years from the commencement of this order, the control of the foreshore described in the First Schedule to this order, subject to the provisions of section 165 of the Act and to the conditions specified in the Second Schedule to this order.

First Schedule

All those areas of foreshore adjoining the County of Taranaki excepting therefrom the foreshore adjoining the City of New Plymouth and more particularly shown on plan marked M.D. 15629 and deposited in the office of the Ministry of Transport at Wellington.

Second Schedule

1. Her Majesty or the Governor-General, and all officers in the Government service acting in the execution of their duty, shall at all times have free ingress, passage, and egress into, over, and out of the said foreshore without payment.

2. Nothing herein contained shall authorise the Council to do or cause to be done anything repugnant to or inconsistent with any law relating to the Customs, or with any regulation of the Minister of Customs, or with any provision of the Harbours Act 1950, or its amendments, or any regulations made thereunder that are or may hereafter be in force.

3. The rights, powers, and privileges conferred by this Order in Council shall not apply to those portions of the foreshore required for securing the shore ends of any telegraph-cables that are at present or may be at any time laid down within the said areas of foreshore.

4. The Council may enclose any part or parts of the foreshore described in the First Schedule hereto for the purpose of holding athletic sports or games, and may by bylaw fix a charge for admission to such enclosed part or parts; provided that the total number of days on which such enclosures are made shall not exceed 6 in any one year.

5. Nothing herein contained shall authorise the Council to remove or cause to be removed any stone, sand, shingle, or shells without the consent of the Minister being first obtained.

6. The Council shall not erect or grant a licence or permit for the erection or continuance of any structures on foreshore adjoining land under the control of a National Park Board or Scenic Board or Domain Board except with the consent of the Board.

7. Bylaws made by the Council under the authority of this Order in Council shall not come into force until they have been approved by the Minister by notice in the Gazette.

8. The said rights, powers, and privileges may be at any time resumed by the Governor-General, without payment of any compensation whatever, on giving to the Council 6 calendar months' previous notice in writing. Any such notice shall be sufficient if given by the Minister, and delivered at or posted to the last known address of the Council in New Zealand.

A. C. McLEOD,
Acting for Clerk of the Executive Council. (M.O.T. 54/14/72)

The Nukumaru Domain Board Foreshore Control Order 1975

DENIS BLUNDELL, Governor-General
ORDER IN COUNCIL
At the Government House at Wellington this 14th day of July 1975
Present:

HIS EXCELLENCY THE GOVERNOR-GENERAL IN COUNCIL.

Pursuant to section 165 of the Harbours Act 1950, His Excellency the Governor-General, acting by and with the advice and consent of the Executive Council, hereby makes the following order.
ORDER

1. (a) This Order may be cited as the Nukumaru Domain Board Foreshore Control Order 1975.
   (b) This order shall come into force on the date of its publication in the Gazette.

2. In this Order—
   "The Act" means the Harbours Act 1950:
   "The Board" means the Nukumaru Domain Board:
   "Foreshore" means those parts of the bed, shore, or banks of a tidal water as are covered and uncovered by the flow and ebb of the tide at ordinary spring tides:
   "Minister" means the Minister of Transport, and includes any officer, person, or authority acting by or under the direction or authority of the Minister.

3. There is hereby granted to the Board for a period of 21 years or such shorter period as the Minister may determine by order, the control of foreshore described in the First Schedule to this order, subject to the provisions of section 165 of the Harbours Act 1950 and to the conditions specified in the Second Schedule to this order.

4. The Order in Council made on 8 June 1966 granting control of part of the foreshore described in the First Schedule to this order is hereby revoked.

FIRST SCHEDULE

1. All that area in the Wellington Land District, being the foreshore in Blocks XIVA and XV A, Nukumaru Survey District, between the right bank of the Kai Iwi Stream and the left bank of the Mowhanau Stream, as illustrated on a plan deposited in the office of the Ministry of Transport at Wellington and marked M.D. 12236.

4. All that area in the Wellington Land District, being the foreshore in Block XIV, Wairoa Survey District, bounded towards the north by the production northerly parallel to or consistent with any law relating to the Customs, or with any regulation of the Minister of Customs, or with any provision of the Harbours Act 1950 or its amendments, or any regulations made thereunder that are or may hereafter be in force.

5. The rights, powers, and privileges conferred by this Order in Council shall not apply to those portions of the foreshore required for public or private use, but shall be limited to such enclosed part or parts:

6. Nothing herein contained shall authorise the Board to remove or cause to be removed any stone, sand, shingle, or shell, without the consent of the Minister being first obtained.

7. The Board shall not erect or grant a licence or permit for the erection or continuance of any structures on foreshore adjoining land under the control of a National Park Board or Scenic Board or Domain Board except with the consent of the Minister.

8. The Board shall prevent any nuisance being caused and shall not permit fish or fish offal to remain on or about the foreshore.

9. The rights, powers, and privileges may be at any time recalled by the Governor-General, without payment or any compensation whatever, on giving to the Board 6 calendar months' notice in writing. Any such notice shall be sufficient if given by the Minister and delivered at or posted to the last known address of the Board in New Zealand.

A. C. McLEOD,
Acting for Clerk of the Executive Council.

(a) Subject generally to the provisions of bylaw No. 7 relating to fires, combustible rubbish must be burned on camp-fires, and all combustible rubbish and refuse of all kind (including, but without limiting the generality of this bylaw) broken glass, bottles, tin cans, etc., must be placed in garbage cans or pits if available, or otherwise must be removed from the Park.

(b) Camp sites shall be left clean and tidy after use.

(5) No person shall use the cabins, buildings, or cooking, abulation, or toilet facilities or other amenities in the Whakapapa Motor Camp or the Mangawhero Camp without obtaining permission from an authorised person and observing the terms of clause (3) of this bylaw and complying with any directions given by an authorised person or official notice.

5. Use of Board's huts—(1) Any person intending to use for more than three successive nights any one hut of the Board erected in a remote area for the purpose of accommodation shall obtain the approval of the Chief Ranger to the dates of such intended use.

(2) The restrictions on the conditions of usage of any hut or building shall be fixed by the Board by resolution from time to time.

(3) A ranger is empowered to terminate any usage of any such hut or building where the terms or conditions fixed by the Board in accordance with clause (2) of this bylaw or where the user acts in such a manner as in the opinion of the ranger is likely to cause damage to the Board's property or to give offence to other persons, or to cause them annoyance.

6. Use of buildings erected by approved organisations—Any club or approved organisation to which a permit has been issued pursuant to section 28 (1) (f) of the National Parks Act 1952 for the erection of a building for accommodation shall comply with the terms of that permit and shall ensure that such organisation or other persons when using such building shall always comply with the terms of any permit.

7. Fires—(1) Nothing in this bylaw shall exempt any person from liability under the National Parks Act 1952 or the Forest and Rural Fire Act 1955 for any other Act with respect to the lighting of fires.

(2) No person shall light any fire within 800 metres of any road except within a camping area set aside by the Board or in a fireplace erected by the Board:

(i) No person shall kindle a fire near trees or dead wood, moss, grass, tussock, lichens, or vegetation, but a fire may be lit in a specially prepared open place on rocks or earth. Fires shall be lighted only when necessary, and when no longer needed they shall be completely extinguished by covering all embers and the bed with earth and water so that there remains no possibility of the fire reviving.

(4) No person shall light a fire in any position where it is likely to present a fire hazard.

(5) Once a fire is lit, the person lighting the fire, or such other person as is detailed by him, shall remain in attendance on the fire until it is completely extinguished.

(6) No match (lighted or not lighted) cigarette, or other lighted matter shall be dropped, thrown, or otherwise placed in any grass or other inflammable material.

8. Vehicles—(1) No person shall use or drive, or cause or permit to be driven or ridden, or permit to be in any part of the Park—

(a) Any vehicle that is drawn or propelled by mechanical power except where authorised by the Board:

(b) Any vehicle of a class excluded by official notice from that part of the Park.

(2) In this bylaw "vehicle" includes hovercraft.

9. Passenger service vehicle parking areas—(1) No person being the driver or in charge of a passenger service vehicle shall park the vehicle in any part of the Whakapapa Villages within the Park except in an area set aside for parking places for passenger service vehicles and in a position and manner indicated by official notice or as directed by a ranger or other authorised person.

(2) The driver or person in charge of a passenger service vehicle shall upon parking his vehicle or intending to park his vehicle in a manner directed by the Board or to a person authorised by the Board shall present the vehicle to the Board or to a person authorised by the Board and shall forthwith cease and desist from parking the vehicle prescribed by this bylaw for each passenger service vehicle for each vehicle parking area set apart for the purpose of parking the vehicle.

(3) The parking fees payable shall be as determined from time to time by the Board and publicly notified by at least one newspaper advertisement.

10. Motor vehicle parking zones—(1) The Board may fix at such time and place as motor vehicle parking zones any area or areas of the Park:

(2) The driver or person in charge of any motor vehicle in a parking zone shall park the motor vehicle only in accordance with the directions given by an official notice or by a ranger or other authorised person and shall forthwith with pay or cause to be paid the parking fee prescribed
by this bylaw in a manner directed by the Board or to a person authorised by the Board to collect such fees.

(3) The parking fees payable shall be as determined from time to time by the Board and publicly notified by at least one newspaper advertisement.

(4) A sticker shall be affixed to the windscreen of, or displayed in a visible position on any motor vehicle in relation to which a season ticket or the other proof of the issue of a season ticket shall be acceptable or required.

11. Aircraft.—(1) No person shall make use of any part of the Park whether land or water for the purpose of landing or alighting thereon or the flying therefrom of aircraft of any kind and, except in accordance with written permission previously obtained from the Board, this bylaw shall not apply at public licensed aerodromes or Government civil aerodromes in the Park or in cases of emergency.

(2) The right to use written or written permission of the Board may be waived in such cases as the Board may nominate at its discretion but this does not absolve persons from compliance with any requirements that the Director of Civil Aviation may stipulate.

(3) The Board shall be entitled at any time to prohibit the entry by the public to any part or parts of the Park that use of which as aerodromes or landing grounds is permitted by the Board.

(4) No person, operator, or pilot in command of an aircraft of any description shall make use of any part of the Park whether land or water for the purpose of setting down, picking up, or recovery from within the Park of any person, live animal, carcass, or article of any description except in accordance with the written permission of the Board previously obtained.

(5) In this bylaw “aircraft” includes aeroplanes, helicopters, gliders, hang gliders, balloons, amphibians, hovercraft, and parachutes.

12. Trading and residence.—No person shall reside permanently, engage in any business, sell or offer for sale any article of food or merchandise, or any kind of drink, or carry on any other pursuit or calling within the Park without the written consent of the Board given subject to such terms and conditions as it deems fit.

13. Ski racing.—No person shall organise, hold or conduct, or engage in any organised ski racing or ski race training within the Park except in accordance with written permission previously obtained from the Board, and then only in accordance with the conditions of such permit.

14. Animals.—(1) No person shall take any cat or dog or any other live vertebrate whatsoever into the Park or keep or have in possession of any such cat or dog or other live vertebrate without the written permission of the Board, or abandon in the Park any such cat, or dog, or other live vertebrate.

(2) No person shall enter any part of the Park shall enter a part of the Park or any other part of which a person or any other part of which an authorisation has been granted under this bylaw

15. Exotics.—Unless otherwise authorised by the Board, every tenant or occupier of any land being part of the Park shall clear and keep clear land so tenanted or occupied by him of all trees, shrubs, and plants (other than grass) which are not indigenous to the Park.

16. Spotlighting.—No person, whether or not the holder of a permit for the use of a firearm within the Park, shall use or attempt to use a spotlight or other source of artificial light as an aid to hunting without the prior written permission of the Board.

17. Public address systems.—No person shall install or operate a public address system or any other type of amplified sound system in the Park without the prior written permission of the Board and then only in accordance with the conditions of such permission.

18. Entry into special areas.—(1) For the purpose of this bylaw a special area means a special area set apart by the Governor-General under section 12 of the National Parks Act 1952.

(2) No person shall enter a special area except with the written permission of the Board subject to such terms and conditions as are deemed fit. Every such permit shall include the following particulars and conditions:

(a) The duration of the permit shall be specifically stated therein;

(b) The names of all persons covered by the permit shall be set out;

(c) The area covered by the permit shall be specified therein.

(3) No permit shall be deemed to include a right to camp or remain overnight, or light camp fires unless the permit expressly so states.

(4) Each permit shall be revocable at the pleasure of the Board.

19. Exclusion of public.—If the Board should be satisfied that any area of the Park or any track within the Park is being used by the public in such manner as to destroy or endanger the native flora or fauna of the Park, the Board may exclude the public from that portion of the Park or restrict the number of persons who may enter or camp in such area. No person shall enter such portion of the Park or track contrary to the Board’s decision.

PART II

Operation of Chairlifts, Ski Lifts, and Ski Tows

20. Interpretation.—In this part of these bylaws, unless inconsistent with the context:

“Chairlift” means a device for the transportation of passengers sitting in chairs attached to and suspended from a moving wire rope, the passengers not being in contact with the ground or snow surface.

“Haul rope” means the rope on a lift or tow moving uphill.

“Licencee” means a licence holder operating a ski lift and/or a tow in the Tongariro National Park under the terms and conditions of a licence issued by the Tongariro Board.

“Lift” or “ski lift” includes both chairlifts and surface lifts.

“Platter lift” means a surface lift having suspended from the haul rope a single stem with a platter or disc attached to its lower end upon which the passenger positions himself astride the stem.

“Qualified engineer” means a person approved by the Board to carry out inspections of ski lifts and tows.

“Return rope” means the rope on a lift or tow moving downhill.

“Rope” means wire rope or wire cable except for rope tows where “rope” means natural or synthetic fibre rope.

“Roape tow” means a device for the transportation of passengers uphill while remaining in contact with the snow, propulsion being by means of a circulating natural or synthetic fibre rope which the passenger grasps or to which the passenger attaches himself by means of a rope gripping device.

“Surface lift” means a device for the transportation of passengers upward along any vertical or inclined plane of the snow surface, propulsion being a circulating overhead wire haul rope.

“T-bar lift” means a surface lift having an inverted-T-shaped device attached to the haul rope with passengers located on either or both sides of the stem of the “T”.

“Tow” includes a rope tow.

21. Records.—A licensee shall maintain the following records for each lift or tow:

(a) Operational log.—An operational logbook to be entered for each day of operations shall be maintained for each ski lift or tow specifying the following minimum information:

(i) Date:

(ii) Operating hours:

(iii) Temperature, wind, and weather conditions:

(iv) Record of compliance with a daily operational inspection:

(v) Position of tension carriage and counterweight:

(vi) Accidents, malfunctions, or abnormal occurrences during operation:

(vii) Names of attendants.

(b) Maintenance log.—A record book shall be kept showing the execution of all maintenance and repair work, components of the lift replacement, and the reason for the maintenance or repair.

(c) Wire-rope log.—A record book shall be kept for each lift using wire rope showing:

(i) Specifications of the rope in use:

(ii) Test reports:

(iii) Date installed:

(iv) Details of each splice:

(v) Records of each lubrication, including type of lubricant, and dates applied:

(vi) Records of each maintenance and annual inspection:

(vii) Reports of damage to rope.
(d) The above records shall be produced on request to any statutory inspecting authority, to the qualified engineer conducting annual inspections and to the Chief Ranger.

22. Inspection and Machinery—(1) Inspection.—(a) The licence will, prior to the use of a surface lift or rope tow by the public, obtain a report from a qualified engineer as to the mechanical and/or structural integrity of all machinery, wire or fibre rope, pylons, sheaves, safety devices, foundry or any other matter which, in the inspector’s opinion, may affect the safety of the public while using the lift or tow.

(b) The licence shall ensure that the tow is in full operational condition for the inspection as aforesaid.

c) A copy of the inspector’s report shall be deposited with the Board immediately on receipt by the licensee.

(d) The licence shall comply immediately with any requisitions of the Board arising from the inspector’s report conveyed to him in writing.

(e) A chairlift shall not carry a fare-paying passenger or passengers unless it is operated pursuant to a valid inspection certificate issued by the Ministry of Transport.

(2) Machinery—(a) All ski lift and tow-driving machinery accessible to the public shall be housed, guarded, or screened in a manner that will prevent the public coming into contact with the machinery.

(b) Except in the case of guide sheaves installed for the haul rope of a rope tow, all moving machinery including sheaves and rope-return wheels shall be screened in a manner to prevent any person or his equipment coming into contact therewith while the machinery is erected at least 2.2 metres above the snow surface.

(c) When an internal combustion engine is used as a prime mover and a guard is provided to the public, the building shall be ventilated to prevent the products of combustion or fuel fumes from contaminating the atmosphere in the engine room.

(d) Engine exhaust pipes shall discharge to the atmosphere and shall not pass within 5 centimetres of any wooden member or flammable material.

(e) Fire extinguishers shall be installed in every engine room.

(f) An exit shall be provided in every engine room to permit a person to leave rapidly in case of flash fire.

(g) Guy wires or struts supporting any pylons, towers, or machinery which are likely to be struck by skiers and which are not in themselves obvious in adverse weather conditions shall be adequately marked and protected.

23. Counterweights and tensioning devices—(1) Counterweights or other tensioning devices shall be so provided to determine and regulate the tension of all haul ropes.

(2) Counterweights, if used, shall be arranged to move freely up and down.

(i) Enclosures for counterweights shall be provided where necessary to prevent snow or ice from accumulating under and around counterweights or otherwise interfering with their free movement.

(4) Where enclosures are not provided, guardrails or screens shall be provided to prevent any person from coming into contact with or passing under counterweights.

(5) A wire rope holding the counterweight shall not contain a splice.

(6) End connections on counterweight ropes shall be such as to prevent failure or slippage under a tension equal to 80 per cent of the strength of the rope and such end connections shall comply with the recommendations of the manufacturers of the wire rope and end fittings respectively.

(7) Instruction plates or signs deformed or damaged shall not be used in any load bearing capacity.

(8) Limit switches shall be installed to stop the lift or tow before the counterweight or tension carriage reaches either end of its travel.

(9) If a counterweight is not used to tension a rope tow, an effective mechanical or hydraulic tensioning system shall be provided and the licensee shall ensure that the haul-rope tension does not exceed a value of one-fifth of the design strength of the rope under the most unfavourable accumulative load of snow, wind and weight of the carriages.

(10) Tension on the haul rope or rope tows shall be maintained at the minimum required to keep the haul rope above the snow surface but not exceeding the maximum tension provided in the preceding bylaw.

24. Brakes.—(1) Chairlifts in addition to service an emergency brake or backstop brake, shall be fitted with an automatic over-riding control which shall interrupt the power to the prime mover and actuate the service brake or similar independent brake.

(2) A backstop brake to prevent an unintended reverse rotation shall be fitted to all lifts and tows.

(3) The service brake, emergency brake, and backstop brake shall be independent systems such that the failure of one system will not impair the function of the other systems. In the event, unless otherwise specified herein, braking systems actuated by emergency-stop devices shall be capable of stopping the rope within a distance of 1 metre under no-load conditions.

25. Electrical—(1) All high voltage electrical installations shall comply with the standard set by the local territorial power supply authority whether that authority supplies the power or not.

(2) All high- and low-voltage cable shall be buried underground in a line approved by the Board and for which a site plan has been deposited with the Board.

(3) All electrical stop-control circuits including emergency or safety-stop systems shall be energised circuits, so that, in the event of malfunction of a switch or of electrical power failure, the lift or tow shall be inoperative.

(4) Terminal machinery, towers, and wire rope shall be effectively grounded.

26. Communications—(1) A chairlift shall be provided with an effective means of communication between both terminals and with any intermediate station.

(2) Communication and control cables may be supported by the towers supporting the lift or tow but low-voltage circuits only shall be installed.

27. Loading and unloading areas—(1) Chairlifts—(a) A loading ramp shall be level, free from all sharp points and edges and so constructed that a passenger can stand comfortably on skis without sliding forwards or backwards.

(b) If any side of a loading or unloading ramp or platform has a steep incline of less than 10°, safety barriers shall be provided for the protection of passengers, lift attendants, and bystanders.

(c) In the case of a flat bottomed loading ramp or platform for loading or unloading passengers, there shall be provided for at least 5 metres from the end of the loading area, and those portions of the supporting structure likely to be struck by a falling passenger be effectively protected to prevent injury to the passenger.

(d) The entry to an unloading ramp shall be so constructed that skis worn by passengers are not caught under the edge of the ramp or platform and will be guided upwards towards the unloading point.

(e) An unloading place shall be level to enable foot passengers to disembark and shall be followed where possible by an inclined ramp sloping sufficiently downwards from the exit of the unloading area to enable passengers to ski away from the chair clear of any machinery and obstacles.

(4) A tower adjacent to a loading point shall be guarded in such a manner to prevent skis worn by passengers becoming caught in the tower when they are becoming settled in the chair.

(g) Where passengers on double chairlifts are required to embark from and disembark to the same side of the chair, the loading and unloading area shall be subject to special design and shall be approved by the Board before used.

(2) Surface lifts—(a) Unless the terrain at the loading point is naturally suitable, the licensee shall construct and maintain an easy access to the lift.

(b) The loading area shall be as nearly flat as is possible and of sufficient length to permit the passenger to embark safely.

(c) Unless the terrain is naturally suitable, the licensee shall construct and maintain a flat or downward disengaging area for the passenger to disembark safely from the towing device. The area shall not be deformed or damaged and shall not be used in any load bearing capacity.

(d) The distance between the end of the unloading area and the upper terminal machinery shall be sufficient to allow the towing device to become fully disengaged and to permit their oscillations to diminish adequately before they enter the terminal.

(3) Rope tow—(a) The loading area shall be level, free of obstructions, and fenced in a manner to guide passengers to the loading point.

(b) The loading area shall be either flat or graded downwards and the loading area shall extend 5 metres from the first pair of fixtures.

(c) In the case of a rope tow using intermediate guides shall be required, the use of a rope-gripping device, the loading area shall extend 10 metres from the first pair of fixtures.

28. Lift and tow lines {surface lifts and rope tows}—(1) With the prior approval of the Board, a track width along the lift or tow line shall be cleared and maintained in such a manner that no rocks or other obstructions project above the snow surface for the full usable length of the lift or tow
to a distance of 1 metre on either side of the centreline of the uphill track.
(2) The designated track width shall be maintained free of snow ridges, wind scour, and humps and hollows likely to unbalance a passenger of ability consistent with the lift or tow in use.
(3) With the prior approval of the Board, the licensee shall fill with rock all downhill sections along the usable length of the uphill or tow over the designated width.

29. **Cleaning**—(a) **Chairlifts**—(a) Where ski-ing is permitted beneath the lift line, there shall be maintained a minimum vertical distance of 3 metres between the snow surface and the lowest point of a chair under conditions of maximum snow pack.
(b) Where, because of abnormal snow build-up beneath the lift line, the minimum vertical distance of 3 metres cannot be maintained at any point, the licensee shall erect an effective barrier to prevent persons ski-ing or walking beneath the lift at that point or points.
(c) The licensee shall not operate the chairlift in the event of abnormal snow build-up permitting chairs to strike the snow at any point.
(d) Chairlift terminals and towers shall not be constructed containing provision for change of the design height of the wire rope.

**Surface lift**—(a) Terminals and towers shall be located so that under the most adverse conditions, the towing device will not lift a chair off the snow surface.
(b) The haul rope shall, at all times, be high enough to clear a passenger's head by at least 60 centimetres.
(c) The return rope shall be of sufficient height to keep downcomers of snow beneath the lift.
(d) The towers shall be of such a height and so located, that, if the up-going haul rope comes off the supporting sheave or sheaves at the tower, the highest of the towers (or terminal) on either side will support the rope clear of the snow by a minimum of 60 centimetres.
(e) Where tows have provision to vary the height of the sheaves above the snow, changes in height of the sheaves shall be controlled in a manner to prevent overloading or underloading the tower sheave-assemblies and any such changes shall be made only in accordance with the design of the towers or specifications.

**Rope tows**—(a) The return rope and its supporting sheaves shall be kept at all times not less than 2.2 metres above the snow surface.
(b) Where for technical reasons the return rope runs in the same plane parallel to or intersects the up-going haul rope and the return rope is less than 1.2 metres horizontally from the haul rope, this portion shall be barricaded off and shall not form part of the usable length of the tow.
(c) There shall be a minimum clearance of 1 metre between the haul rope and any pylon located between the loading and unloading areas.
(d) Spikes, hooks, or other projections shall not be placed on rope supports lower than 2.2 metres above the snow surface.

**Speeds**—(1) Lifts and tows shall not be operated at speeds greater than those specified by the manufacturer.
(2) Chairlifts shall not be operated for the loading and unloading of passengers at speeds greater than 106 metres per minute in the case where foot passengers are being carried and at a speed greater than 183 metres per minute when skiers only are being carried.

**Loading**—Lifts and tows shall not be operated with loadings greater than those specified by the manufacturer.

**Structures and foundations**—(1) All structures and foundations shall be designed for the weights of the loading to be imposed and design loads shall include all loads which will be encountered during operations.
(2) Structures and foundations located in snow creep areas shall be capable of bearing such loading or shall be protected by adequate snow breakers or snow shears.
(3) Rope-tow pylons shall be firmly supported in the ground below grade.

**Fuel**—Liquid fuel shall be used and stored in accordance with the Dangerous Goods Act 1957.

**Signs**—The following signs either written or conveyed pictorially shall be displayed at the appropriate places:
(a) Chairlifts—
1. "IF NOT FAMILIAR WITH USE OF LIFT ASK ATTENDANT FOR INSTRUCTIONS".
2. "PREPARE TO DISMOUNT".
3. "KEEP SKI TIPS UP" (Ahead of any point where skis may come in contact with a platform or skis on the snow surface).
4. "DISMOUNT HERE".
5. "REMOVE POLE STRAPS FROM WRISTS".
6. "IF CHAIRLIFT STOPS ............ " (Passenger to be told what he must do).
7. Sign showing the correct method of using safety bars.
(b) Surface lifts—
1. "IF NOT FAMILIAR WITH USE OF LIFT ASK ATTENDANT FOR INSTRUCTIONS".
2. "PREPARE TO DISMOUNT".
3. "STAY IN TRACK".
4. "DISMOUNT HERE".
5. "LOOP POLE STRAPS OVER RIGHT (OR LEFT) WRIST".
6. "IF EMERGENCY STOP USED ADVISE ATTEND- ANT, LIFT WILL NOT BE STARTED UNTIL YOU DO".
7. "STOP LIFT T-BAR (POMA DISC) DOES NOT RETRACT".

(c) **Tows**—
1. "IF NOT FAMILIAR WITH USE OF TOW ASK ATTENDANT FOR INSTRUCTIONS".
2. "NO LOOSE SCARVES, NO LOOSE CLOTHING, NO LONG HAIR EXPOSED".
3. "LOOP POLE STRAPS OVER RIGHT (OR LEFT) WRIST".
4. "RELEASE ROPE IF OBSTRUCTION ON TRACK".
5. "IF EMERGENCY STOP USED ADVISE ATTEND- ANT, TOW WILL NOT BE STARTED UNTIL YOU DO" (To be used when attendant cannot see the full length of the tow line).

35. **Operating and maintenance manuals**—(1) A licensee operating a chairlift or surface lift shall obtain from the manufacturers or designers or manufacturers copies of an operational manual for each installation one of which shall be deposited with the Chief Ranger.
(2) The operational manual shall contain the design criteria in respect of the chairlift or surface lift and shall describe the function and operation of the components and instructions for the correct usage of the installation and specifications for wire rope used in any load-bearing capacity.
(3) A licensee operating a chairlift or surface lift shall obtain from the manufacturer or designer two copies of a maintenance manual one of which shall be deposited with the Chief Ranger.
(4) The maintenance manual shall describe recommended maintenance procedures including—
(a) Types of lubricants required and frequency of application.
(b) Definitions and measurements to determine excessive wear.
(c) Recommended frequency of service to specific components including relocation of fixed grips if applicable.
(d) A specific period of time which shall represent one complete cycle of maintenance operations for all component parts assigning a time or times within that cycle for the inspection of and the maintenance work on each component either on an hours run or other periodic basis.
(5) A licensee operating a chairlift, surface lift, or tow shall prepare daily and other routine inspection and maintenance schedules, a copy of which shall be deposited with the Chief Ranger.
(6) Compliance with the inspection and maintenance procedures shall be entered in the operational and maintenance foigroups.

36. **Operations**—(1) A licensee shall prepare ski lift or tow-operating instructions, a copy of which, as well as amendments thereto, shall be deposited with the Chief Ranger.
(2) The operating instructions shall be directions to the licensee's staff for the safe operation of the licensee's facilities and shall include emergency operations and shall contain a direction that a lift or tow shall not be restarted after an emergency stop has been actuated unless the attendant has been told of the reason for the stoppage and is satisfied that it is safe to restart the lift or tow.
(3) No person shall start a lift or tow after stoppage unless he has been informed of the reason for the stoppage and is satisfied that it is safe to restart.
(4) A licensee shall ensure that each staff member is fully conversant with procedures to evacuate passengers from a chairlift whether for emergency reasons or not.
(5) The licensee shall ensure that, where a chairlift stops during adverse weather conditions likely to subject passengers to exposure (hypothermia) passengers are removed from the chairlift in the quickest possible time.
(6) A licensee operating a chairlift shall, at the request of the Board, ensure that all ski patrol members and Park
Rangers and conversant with chairlift evacuation procedures.

37. Minimum operating personnel

(1) Chairlifts—The licensee shall provide one qualified person to be in charge of the chairlift when operating and at least one attendant on duty at each loading area and one attendant at each unloading area, provided that:

(a) The person in charge shall be stationed at the loading area immediately adjacent to the driving machinery and may license concurrently as an attendant at that area unless his duties as an attendant preclude his maintaining surveillance of the operation of the lift.

(b) An area used for both unloading and loading may be maintained whenever both loading and unloading of chairs is not carried out simultaneously and the loading and unloading can be adequately supervised by one attendant.

(2) Surface Lifts—The licensee shall provide at least one qualified person to be in charge of the lift who shall be stationed at the loading area immediately adjacent to the driving machinery.

Where the operator in charge cannot see the entire length of the lift including the unloading area, the licensee shall, at the direction of the Board, station one or more attendants at a point or points along the line of the lift or at any unloading point as designated by the Board.

A tow station shall be stationed at least one attendant at each tow at each loading point, provided that if two or more tows are immediately adjacent to one another and the attendant can adequately keep the use of the tows under surveillance and he has effective means to stop each tow under his immediate control then one attendant may, by the discretion of the licensee, supervise the operation of more than one tow.

38. Emergency-stop devices

(1) Chairlifts—(a) Each chairlift shall be equipped at each loading and unloading area, in a position immediately adjacent to the attendant, with a device to stop the chairlift.

(b) Each such device shall be clearly marked “Emergency Stop.”

(c) An automatic stopping device shall be fitted to stop the chairlift in the event of the rope departing from its normal running position or derailing from any sheave or sheave trackage.

(2) Surface Lifts—(a) Each lift shall be equipped at each loading and unloading point with a device to stop the lift.

(b) If the attendant in charge cannot see the entire length of the lift line further lift-stop devices shall be installed at points designated by the Board along the lift line.

(c) Each stop device shall be clearly marked “Emergency Stop.”

(d) Each lift shall be equipped at or near the upper terminal with an automatic safety stop which will be actuated when the passenger released the towing rope at a predetermined distance from the upper terminal installation and which will bring the rope to a stop within half the distance between the stop device and the upper terminal installation or in every case before the passenger or his equipment comes into contact with any machinery or other obstacle.

(3) Fibre rope tows—(a) Each tow shall be equipped adjacent to and in front of the loading point with a device to stop the tow.

(b) Further stop devices shall be installed at points along the tow line as designated by the Board.

(c) Each stop device shall be clearly marked “Emergency Stop.”

(d) An effective automatic tow-stop device shall be erected at the unloading point across the tow line in such a manner that it is actuated by a passenger who has passed the unloading area.

The automatic tow-stop device shall be capable of bringing the tow to a full stop in half the distance between the stop device and the tow-terminal machinery and in every case before the passenger or his equipment can come into contact with the machinery or any other obstacle.

(2) In the case of fibre rope tows having intermediate guide sheaves at an appropriate number of points, requiring the stop devices shall be installed on each rope support pylon and clearly marked “Emergency Stop,” provided that in place of emergency-stop devices on each pylon, a mechanical stopping device of fibre rope tows shall be of such a design that the length of the tow in such a manner that a pressure of no more than 6.8 kilograms applied at any point to the safety rope or wire will activate the stop device and provided also that in the event of breakage or other failure of the safety rope or wire, the tow is brought to a stop.

39. Special Requirements

(1) Chairlifts—(a) Each tower shall be fitted with an anti-crash bar designed to prevent chairs or other objects at the same time striking a device, unless the designer of the chairlift certifies to the satisfaction of the Board that either an anti-crash bar is unnecessary or would create a greater hazard than that desired to be avoided by fitting thereof.

(b) Chairs shall be equipped with a railing at each side, to a height of not less than 15 centimetres above the seat for a distance of not less than 30 centimetres from the back of the seat.

(c) Chairs shall have rounded corners and have no projections which may catch clothing, straps, or any equipment carried by the passenger.

(d) The licensee shall not permit the use of the lift by any person carrying anything likely to impede that person in using the lift in a safe manner.

(e) Each chair shall be fitted with a safety bar in front of the passenger fitted in such a manner that a passenger is unable to fall forward in case of the chair设计师 of the chairlift certifies to the satisfaction of the Board that because of the design of the chair a safety bar is unnecessary or would create a greater hazard than that desired to be avoided by fitting thereof.

(f) Adequate rescue equipment shall be provided for each chairlift for removing passengers from suspended chairs in the shortest possible time after the operation of a complete stoppage.

(g) Except in an emergency or for the conveyance of sick or injured persons, no person shall be permitted to use the chairlift except in the chairs provided.

(h) Lift passengers on a chairlift shall remain seated and shall use the facility in an orderly and proper manner and shall not throw or expel therefrom any object or do any act or thing which shall interfere with the operation of the chairlift.

(i) A person shall not embark or disembark at other than attended loading and unloading points.

(j) Each chairlift shall be fitted with an auxiliary internal combustion motor which shall be maintained in such a condition that it can be brought quickly into use in the event of a power failure or other stoppage requiring the immediate unloading of passengers.

(k) Drive and return sheave frames shall retain the sheave and hauling rope in the event of shaft breakage, bearing failure or cable deropement.

(2) Surface Lifts—(a) Any towing device which envelopes the passenger such as a strap shall not be installed.

(b) If any retractable towing device fails to retract, the lift shall be stopped immediately and the device removed from the rope.

(c) Except with the specific approval of the Board given under such terms and conditions as it thinks fit, a surface lift requiring the passenger to hold the towing device while it retracts shall not be permitted.

(d) Towing devices shall be of sufficient length so that the shortest passenger remains in firm contact with the snow at all times.

(e) T-type towing attachments shall be of durable material and shaped and of sufficient width so that the passenger is held into the bar and does not tend to slip off the end.

(f) Wooden T-type shall be constructed of wood which does not splinter in the event of damage.

(g) Disc or platter type attachments shall have rounded edges and shall be of sufficient width to enable the passenger to maintain himself comfortably during travel.

(h) Towing devices which do not accelerate the passenger smoothly from a standing start shall be removed from the rope.

(i) A surface lift shall not be operated if any part of the usable length between the loading and unloading points has a reverse (downwards) slope.

(j) Drive and return sheave envelopes including a floating bull wheel shall be so designed that they will be retained in the event of shaft breakage bearing failure, cable deropement or failure of any part or rope suspending system. For the purposes of this clause a “floating bull wheel” means a return sheave
and supporting framework of which is suspended by a system of wire ropes.

(3) Fibre rope tow—(a) Novice rope tow shall not contain intermediate guide sheaves on the haul rope between the loading and unloading areas.

(b) The prime mover of a rope tow shall have sufficient power output to start the tow when fully loaded and the rope reducers shall have ample capacity to withstand starting the tow when fully loaded.

(c) Where used, clutches shall be of ample size to carry the load and permit controlled slipping for smooth acceleration during starting without overheating.

(d) A satisfactory method shall be provided to ensure smooth acceleration when starting from a full stop whether under no load or maximum load conditions.

(e) Constant operating speed shall be maintained.

(f) Rope drive and idler sheaves shall be of such design and so arranged as to prevent undue stressing, wear, or disfiguration of the rope.

(g) Rope drive sheaves, idler sheaves, return or head sheaves and deflection sheaves shall be sheaves, pulleys or wheels grooved for the diameter of rope in use.

(b) Counterweights or other tensioning devices shall be adequate to prevent the rope slipping on the drive sheave but shall not load on the haul rope.

(i) When the haul rope is correctly tensioned but tension is insufficient to retain the return rope in the grooves of one or more of the return rope sheaves at all times, a suitable device shall be used to prevent the rope leaving the sheave or sheaves.

(j) If the head sheave positioned on the end of the tow opposite the drive mechanism shall be grooved and mounted so that the rope cannot jump off the sheave. It shall be mounted in a manner to prevent the sheave falling to the ground if the rope breaks.

(k) The licensee shall each day, before use by the public, ensure that the tow is inspected for satisfactory operation and that all safety devices are functioning.

(1) The rope shall be manila or synthetic fibre rope of a type selected as suitable for ski tow use with a special lay or braid to minimise twist.

(n) The licensee shall ensure that a new rope has been reeled by the manufacturer in a manner to minimise twist and the manufacturers’ instructions for unreeling and installation shall be followed.

(o) Ropes shall not be used unless rotation of the up-going haul rope is minimal and in no case is greater than one complete revolution in 60 metres of travel.

(p) Temporary short splices may be used to join a rope which breaks during towing operations but the licensee shall ensure that a short splice is replaced by a long (transmission) splice before use by the public on the next day of operations.

(q) The haul rope shall be maintained at all times above the snow at a height convenient for use.

(q) A tow shall not be operated if any part of the usable length has a reverse (downward) force greater than 15.9 kilograms or an upward force greater than 13.6 kilograms when held at a height of 60 centimetres above the snow surface by a single passenger.

40. Additional requirements for fibre rope tow—Which have intermediate guide sheaves between the loading and unloading points on the up-going haul rope:

(a) A licensee operating this type of rope tow shall not permit the use of the tow by any person not using a rope-gripping device and shall display a notice to this effect.

(b) No person shall use a rope tow with intermediate line sheaves without employing a rope gripping device.

(c) The licensee shall not permit the use of a rope gripping device which does not release the rope when the user releases his grasp.

(d) The licensee shall not operate the tow if snow conditions are such that any passenger is being lifted clear of the snow surface at any point.

(e) Intermediate sheaves between the loading and unloading areas shall be adequately grooved to accept the rope of the tow and keep it in use.

(f) Intermediate sheaves shall be fully adjustable vertically and shall be adjusted to keep the rope at a convenient level for the passengers at all times.

(g) Each intermediate sheave shall have a rope guide on the top and the bottom to prevent the rope coming off the sheave to the inside of the sheave nearest the support pylon and shall be so constructed as not to impair the passage of the rope gripping device over the sheave or cause any additional hazard to the passenger.

(h) Where sheaves are used in tandem and the rope passes over the top of one and underneath the other, the circumference of one sheave shall not be closer than 10 centimetres to the circumference of the other and the loading of the rope on either sheave shall be kept to a minimum.

41. Specific departures—(1) Notwithstanding the provisions of any of the preceding bylaws the Board may in writing on such terms and conditions as it deems fit grant a specific departure from any bylaw if the Board is satisfied that such specific departure is an adequate substitute for the bylaw or that the bylaw does not adequately cover the device operating condition or any other circumstances.

(2) An application for a specified departure shall be made in writing addressed to the Secretary of the Board. Each application shall contain full reasons for the departure sought together with a previous history of operations carried out in the proposed manner and details of any accidents that have occurred under such operation.

PART III
MISCELLANEOUS

42. Revocations—All previous bylaws made by the Board are hereby revoked.

43. Proceedings—Nothing in these bylaws shall be deemed to limit or prevent the taking of proceedings under any Act in respect of any offence committed within the Park.

The foregoing bylaws were made by resolution of the Board at its meeting held at Wellington on the 14th day of April 1975.

J. S. MACLEAN, Chairman.
M. C. BRITTON, Secretary.

The foregoing bylaws of the Tongariro National Park Board are hereby approved, this 28th day of May 1975, by the National Parks Authority.

N. S. COAD, Chairman.

Price Order No. 2319 (Woolpacks)

Pursuant to the Control of Prices Act 1947, I, Maurice John Selgrave, pursuant to a delegation from the Secretary of Trade and Industry acting under a delegation from the Price Tribunal, hereby make the following price order.

PRELIMINARY

1. This order may be cited as Price Order No. 2319 and shall come into force on the 19th day of September 1975.
2. (1) Price Order No. 2285* is hereby revoked.

(2) The revocation of the said price order shall not affect the liability of any person for any offence in relation thereto committed before the coming into force of this order.

APPLICATION OF THIS ORDER

3. This order applies only with respect to sales by way of retail of 1067 mm woolpacks.

FIXING MAXIMUM RETAIL PRICE OF WOOLPACKS TO WHICH THIS ORDER APPLIES

4. (1) Subject to the following provisions of this clause, the maximum price that may be charged or received by any retailer for any woolpack to which this order applies shall be:

(a) For woolpacks sold by a retailer carrying on business at one of the ports of Auckland, Wellington, Lyttelton, Dunedin, Timaru, Bluff, or Napier, and which landed in New Zealand at one of the said ports before the 5th day of May 1975: $1.75 each.

(b) For woolpacks sold by a retailer carrying on business at one of the ports mentioned in paragraph (a) hereof; and which landed in New Zealand at one of the said ports on or after the 5th day of May 1975:

(i) In the case of woven polyethylene woolpacks: $1.57 each.

(ii) In the case of jute woolpacks: $2.20 each.

(c) For woolpacks sold by a retailer carrying on business elsewhere than at one of the ports mentioned in paragraph (a) hereof; and which landed in New Zealand before the 5th day of May 1975: $1.75 each, increased by the appropriate proportion of the freight charges incurred by the retailer in obtaining delivery from such one of the said ports as is most convenient of access to his store:

Provided, that where any woolpacks to which this paragraph applies are obtained by the retailer elsewhere than from such one of the said ports as is most convenient of access to his store, the increase authorised by this paragraph shall not exceed the appropriate proportion of the freight charges that would have been incurred by the retailer if the woolpacks had been obtained from that port and if delivery had been effected at current freight rates.

(d) For woolpacks sold by a retailer carrying on business elsewhere than at one of the ports mentioned in paragraph (a) hereof; and which landed in New Zealand on or after the 5th day of May 1975:

(i) In the case of woven polyethylene woolpacks: $1.57 each;

(ii) In the case of jute woolpacks: $2.20 each; increased by the appropriate proportion of the freight charges incurred by the retailer in obtaining delivery from such one of the said ports as is most convenient of access to his store:

Provided that, where any woolpacks to which this paragraph applies are obtained by the retailer elsewhere than from such one of the said ports as is most convenient of access to his store, the increase authorised by this paragraph shall not exceed the appropriate proportion of the freight charges that would have been incurred by the retailer if the woolpacks had been obtained from that port and if delivery had been effected at current freight rates.

(2) The maximum prices fixed by the last preceding sub-clause are fixed as for delivery f.o.r. or f.o.b. as the case may require.

(3) Where any woolpacks are delivered by a retailer otherwise than f.o.r. or f.o.b., the price that may be charged by the retailer shall be the appropriate price in terms of the foregoing provisions of this clause increased by the amount of the freight charges incurred by him in effecting delivery and then reduced by the amount of those charges that would have been incurred by him if he had delivered the woolpacks f.o.r. or f.o.b. as aforesaid.

4. Any freight charges imposed by a retailer pursuant to the foregoing provisions of this clause shall be shown separately on the appropriate invoice.

5. Notwithstanding anything in the foregoing provisions of this order, and subject to such conditions, if any, as it thinks fit, the Tribunal, on application by any retailer, may authorise special price in respect of any woolpacks to which this order applies where special circumstances exist, or for any reason extraordinary charges (freight or otherwise) are incurred by the retailer. Any authority given by the Tribunal under this clause may apply with respect to a specified lot or consignment of woolpacks or may relate generally to all woolpacks to which this order applies sold by the retailer while the approval remains in force.

Dated at Wellington this 15th day of September 1975.

M. J. BELGRAVE,
Director of Prices and Stabilisation Division.

DIRECTIONS FOR EDUCATIONAL DEVELOPMENT

A REPORT PREPARED BY THE ADVISORY COUNCIL ON EDUCATIONAL PLANNING

This report marks the culmination of the activities of the Educational Development Conference. The Advisory Council has recommended the directions it considers New Zealand education should go in the next 5 or 10 years.

Five principal areas are identified as requiring attention. Education is seen as a lifelong activity, and emphasis is therefore placed on the "foundations"—early childhood education, the school curriculum and special provision for special needs, and parent education.

Specific attention is given also to the relationships between the school and the community, the need for close mutual support and co-operation, including understanding and respect for minority cultures.

A key to the quality of education is the people involved in it. Teacher education, the availability of advisory and ancillary staff, as well as resources for materials and research, have a chapter devoted to them.

Since education is seen as a lifelong activity, this is considered at some length. Facets such as accessibility, transfer of credits, and the role of existing institutions are discussed, together with ways in which continuing education could be provided for the whole community.

In discussing the administration and organisation of education, the principle followed is the maximum devolution of authority and responsibility to the agencies and the community, at for instance, school committee and district level.

GROWING TAMARILLOs
Agriculture Bulletin No. 307
Ministry of Agriculture and Fisheries
The tamarillo or tree tomato is a native of the Andean region of Peru. The first known record of the tamarillo in New Zealand is in the 1891-92 catalogue of D. Hay and Sons, Auckland.
The commercial production of tamarillos in this country began in a small way more than 50 years ago, but it was not until the supply of tropical fruits such as bananas, pineapples, and citrus from overseas was restricted during World War II that any appreciable quantities were produced for marketing.
In New Zealand this fruit used to be called the tree tomato. The tree tomato officially had its name changed to "Tamarillo" in January 1967 to provide a more appealing and exotic name, especially for export promotion.
This handy little booklet supplies information on how to grow and care for tamarillo plants.
