

DIRECTIONS FOR EDUCATIONAL DEVELOPMENT

A REPORT PREPARED BY THE ADVISORY COUNCIL ON EDUCATIONAL PLANNING

141 p. 1975. \$2.25

This report marks the culmination of the activities of the Educational Development Conference. The Advisory Council has recommended the directions it considers New Zealand education should go in the next 5 or 10 years.

Five principal areas are identified as requiring attention.

Education is seen as a lifelong activity, and emphasis is therefore placed on the "foundations"—early childhood education, the school curriculum and special provisions for special needs, and parent education.

Special attention is given also to the relationship between the school and the community, the need for close mutual support and co-operation, including understanding and respect for minority cultures.

A key to the quality of education is the people involved in it. Teacher education, the availability of advisory and ancillary staff, as well as resources for materials and research, have a chapter devoted to them.

Since education is seen as a lifelong activity, this is considered at some length. Facets such as accessibility, transfer of credits, and the role of existing institutions are discussed, together with ways in which continuing education could be provided for the whole community.

In discussing the administration and organisation of education the principle followed is the maximum devolution of authority and responsibility to the agencies and the community, at for instance, school committee and district level.

DISEASES OF TREE FRUITS IN NEW ZEALAND

By J. D. Atkinson (Plant Diseases Division)

INFORMATION SERIES NO. 81

406 p., 183 illustrations. \$7.50

A summary of current knowledge, including a considerable amount of previously unrecorded information. It is written primarily for advisory officers, students, and growers, and no attempt has been made to give full descriptions of the bacteria, fungi, and viruses.

A DICTIONARY OF THE MAORI LANGUAGE

By H. W. Williams

\$6

The seventh revised edition, augmented by the advisory committee on the teaching of the Maori language.

DOMINION MUSEUM MONOGRAPHS

Elsdon Best (1856-1931), who was a member of the staff of the Dominion Museum from 1911 to 1931, made a notable contribution to the study of Maori ethnology. After a lifetime of experience, including many years in close contact with the Maoris of the Urewera, he spent the last 20 years of his life writing particularly of the social customs and beliefs of the Maori people. There is still a demand for the many monographs written by Elsdon Best and the following titles have been reprinted without alteration to the original text (National Museum):

No. 1. Some Aspects of Maori Myth and Religion.	43 p.	c	60
No. 2. Spiritual and Mental Concepts of the Maori.	57 p.		75
No. 3. The Astronomical Knowledge of the Maori.	80 p.		60
No. 4. The Maori Division of Time.	51 p.	60
No. 5. Polynesian Voyagers.	54 p.	80
No. 6. The Maori School of Learning.	31 p.	50

ECONOMICS OF THE NEW ZEALAND MAORI

By Raymond Firth

519 p. 1972. \$7

The Maori people are honourably known far outside the confines of their New Zealand home. Acknowledged to be one of the finest of the native races within the British Commonwealth they have long been celebrated for their splendid physical appearance, their proud bearing, their aristocratic spirit, their fluent oratory, and above all for their prowess in war. This book contains an account of the social and economic organisation of the Maori people before the organisation was transformed by contact with Western civilisation. It is a major scientific contribution to economic anthropology and has now become a standard work.

EDUCATIONAL PLANNING IN NEW ZEALAND

432 p. 1974. \$6

This book contains the papers presented at a seminar on educational planning held at Victoria University of Wellington from 14 to 19 May 1972. This seminar was intended to lay the foundation for later seminars which would probe education problems in depth. Three main themes were chosen for the seminar, "Educational planning in its relation to national economic planning", "Planning the structure and content of education", and "Information and techniques for educational planning". Edited by W. L. Renwick and L. J. Ingham, this book will interest a wide range of people.

THE EFFECTS OF RACE AND SOCIO-ECONOMIC STATUS ON JUVENILE OFFENDING STATISTICS

31 p. 1975. \$1

This report examines the extent to which the difference in European and non-European offending rates reflects variations in the socio-economic distributions of the two populations. The results indicate that, while a substantial proportion of the difference in offending rates for the two racial groups can be attributed to socio-economic factors, the larger part of this difference cannot be accounted for in this way. Both the theoretical and the practical implications of this finding are discussed. (Research Unit, Joint Committee on Young Offenders.)

EFFECTIVE DISCUSSION

52 p. 50c

Although originally written for staff training purposes in the Public Service, this booklet became popular with outside organisations as a guide to the conduct of meetings. It describes planning and organising both large and small group discussions and contains many useful hints which will help the discussion leader to get the best out of his group, whether he is an old hand or a novice at leading discussion. Also included are lists of books for further reading and recommended films. (State Services Commission.)

ENERGY AND THE ENVIRONMENT

Edited by D. M. Adcock

156 p. 1974. \$4.50

This book is intended as a valuable summary of energy technology and its associated problems. The authors discuss different aspects of the economic, social and environmental consequences of unrestrained growth in electricity and total energy consumption. Power construction schemes are likely to have considerable environmental impact at a time of increasing awareness of the need for environmental conservation. Series No. 19. (N.Z. Institute of Public Administration.)

ENGINEERING PUBLICATIONS

Now available through Government bookshops are the following engineering publications that will be of interest to all civil engineers and those associated with engineering. These publications, prepared by the Civil Engineering Division of the Ministry of Works and Development, supply such information as: stress, load bearing, design, and examples of the various equations.

ASSESSMENT OF POSTING WEIGHT LIMITS FOR HIGHWAY BRIDGES

(CDP 704/B) November 1974

13 p. \$1.60

BRIDGE CLASSIFICATION AND DECK GRADING FOR OVERWEIGHT PERMITS

Issue (A) June 1973

40 p. \$2.50

DESIGN TABLES

(CDP 802/B) October 1974

8 p. \$1.40

DUCTILITY OF BRIDGES WITH REINFORCED CONCRETE PIERS

(CDP 810/A) April 1975

109 p. \$7

RETAINING WALL DESIGN NOTES

(CDP 702/C) 1973

88 p. \$4.75
