**PLANTS IN NEW ZEALAND POISONOUS TO MAN**

By JOSE STEWART. Revised by H. E. CONNOR

1975

This revised edition of Mrs Stewart's Book, which was first published in 1964, is a handy colourful guide to the 50 or more plants in New Zealand known or suspected to be toxic to man. The plants are listed in alphabetical order by their common names and each entry has a colour photograph identifying the poisonous part of the plant. The botanical name, a general description of the plant, the toxin, and the symptoms of poisoning are also given. Plants that are toxic, if eaten, and touch irritants are dealt with in separate sections.

A general instruction on what to do if poisoning occurs or is suspected is featured prominently at the beginning of the book for ready access in emergency.

The material in the booklet is useful, succinct, and attractively presented. Although it has wide appeal generally, it is particularly valuable to parents of the young and curious.
