Statement of Accounting Policies

1. (a) Amortisation of public securities: Book values of New Zealand Government and local authority securities which are purchased at a discount or a premium, are being amortised annually so as to attain their redemption values by maturity date.

(b) Profits and losses on realisation of public securities: The difference between the book value and proceeds on realisation of New Zealand Government and Local Authority Securities is taken to Profit and Loss Account in equal annual instalments over a period of 5 years commencing with the year in which they arise.

2. Investments: The New Zealand Government and local authority securities are all redeemable at par at fixed dates. Whilst in the ordinary course of business some realisation of the Bank's investment in these securities may take place, at prices below book values, it is the opinion of the directors that existing reserves are sufficient to cover any losses that are likely to arise on sales undertaken in the normal course of business.

On behalf of the board: T. L. WEBB, Chairman.

NOTES TO THE ACCOUNTS

1. (a) Amortisation of public securities: Book values of New Zealand Government and local authority securities which are purchased at a discount or a premium, are being amortised annually so as to attain their redemption values by maturity date.

(b) Profits and losses on realisation of public securities: The difference between the book value and proceeds on realisation of New Zealand Government and Local Authority Securities is taken to Profit and Loss Account in equal annual instalments over a period of 5 years commencing with the year in which they arise.

2. Investments: The New Zealand Government and local authority securities are all redeemable at par at fixed dates. Whilst in the ordinary course of business some realisation of the Bank's investment in these securities may take place, at prices below book values, it is the opinion of the directors that existing reserves are sufficient to cover any losses that are likely to arise on sales undertaken in the normal course of business.

As at 30 June 1977.

Book Value: $26,411,936.

Market Value: $24,895,725.

DIRECTIONS FOR EDUCATIONAL DEVELOPMENT
A REPORT PREPARED BY THE ADVISORY COUNCIL ON EDUCATIONAL PLANNING
141 p. 1975.
$2.50
This report marks the culmination of the activities of the Educational Development Conference. The Advisory Council has recommended the directions it considers New Zealand education should go in the next 5 or 10 years.
Five principal areas are identified as requiring attention.
Education is seen as a lifelong activity, and emphasis is therefore placed on the "foundations"—early childhood education, the school curriculum and special provisions for special needs, and parent education.
Special attention is given also to the relationship between the school and the community, the need for close mutual support and co-operation, including understanding and respect for minority cultures.
A key to the quality of education is the people involved in it. Teacher education, the availability of advisory and ancillary staff, as well as resources for materials and research, have a chapter devoted to them.
Since education is seen as a lifelong activity, this is considered at some length. Facets such as accessibility, transfer of credits, and the role of existing institutions are discussed, together with ways in which continuing education could be provided for the whole community.
In discussing the administration and organisation of education the principle followed is the maximum devolution of authority and responsibility to the agencies and the community, at for instance, school committee and district level.

ECONOMICS OF THE NEW ZEALAND MAORI
By Raymond Firth
$8.75
The Maori people are honourably known far outside the confines of their New Zealand home. Acknowledged to be one of the kindest of the native races within the British Commonwealth they have long been celebrated for their splendid physical appearance, their proud bearing, their aristocratic spirit, their fluent oratory, and above all for their prowess in war. This book contains an account of the social and economic organisation of the Maori people before the organisation was transformed by contact with Western civilisation. It is a major scientific contribution to economic anthropology and has now become a standard work.
