The general accounting principles recommended by the New Zealand Society of Accountants for the measurement and reporting of profits on an historical basis have been followed. Particular accounting policies used which significantly affect the measurement of the Bank's profit and its financial position, are set out below:

(a) Depreciation—Fixed assets are being depreciated on a straight line basis at rates which will write off the cost over their estimated useful lives to estimated residual values. The principal write off periods are:

- Buildings: 40-100 years.
- Computer and office calculating equipment: 10 years.
- Furniture and fittings: 10-15 years.
- Other fixed assets: 3-15 years.

(b) Personal loan interest—Interest on personal loans is apportioned over the term of the loan, using the “Rule of 78” method.

(c) Taxation—Taxation charged against net profit includes both current and deferred tax. Deferred taxation arises from timing differences related to:

1. Interest accrued on investments, and
2. Depreciation charges.

(d) Valuation of investments—Investments are recorded at cost. Both New Zealand Government and Local Authority Securities are normally held to maturity and their value on redemption approximates cost.

PROVIDENT AND WELFARE FUNDS

During the year ended 31 March 1977, Staff Funds were separated from Bank investments and externally invested. Accordingly, no interest is payable by the Bank.

Auditors Report

We, the undersigned, being the auditors of the Auckland Savings Bank, appointed in terms of section 29 (3) of the Trustee Savings Banks Act 1948, report:

1. We have examined the books, accounts, and vouchers of the Bank and have received all the information and explanations we have required.
2. We have verified the cash, investments, securities, and assets of the Bank as at 31 March 1978.
3. The general-manager has certified that, to the best of his knowledge and belief, all requirements of the Trustee Savings Banks Act 1948, and regulations thereunder have been complied with.
AUDITOR’S CERTIFICATE

I report that I have examined the balance sheet of the Bay of Plenty Savings Bank as at 31 March 1978, and the related revenue account for the year ended on that date and have received all the information and explanations I have required. In my opinion the balance sheet and revenue account presents fairly in general conformity with generally accepted accounting principles the financial position of the Bank as at 31 March 1978, and the results of the operations for the year ended on that date and were received as at 31 March 1978.

The provision for income tax charged to the Profit and Loss Account is the calculated amount of tax payable in respect of the accounting profit, after appropriate adjustments required by the Inland Revenue Department.

The provision for deferred taxation represents the tax liability on accrued interest or investments, included in income, but not in the Profit and Loss Account is the calculated amount of tax payable in respect of the accounting profit, after appropriate adjustments required by the Inland Revenue Department.

Tauranga, 29 May 1978.

GENERAL PUBLICATIONS

MAORI AGRICULTURE
By Elsdon Best
National Museum Bulletin No. 9
315 p. 1976. $13.50
The only comprehensive study of Maori agriculture available, this bulletin adds a further volume to the series of Elsdon Best's works which the Government Printer undertook to reprint preserving the original text and bulletin numbers. I recommend this book and the series as a whole; to collectors, archaeologists, and to those studying the prehistoric economy of the Maori people. (Government Printer.)

THE MAORI AS HE WAS
By Elsdon Best
295 p. 1974 reprint. $6.50
Fifty years of public demand since this book was first published resulted in the need for reprints in 1934 and 1952. The text has been reproduced unchanged but the originals of some of the figures could not be traced and these have been replaced with similar illustrations. There have been many advances in our knowledge of Maori life since this book first appeared. The work of numerous ethnologists, and more recently archaeologists, has critically examined many of the earlier concepts, confirming some, disproving others, and altering others to varying degrees. No one has yet produced a synthesis of the results of all this scholarship and there is still nothing as comprehensive as this book of Best's to give a general account of the Maori. This book was first published when Best was 68 and thus represents the accumulated knowledge of a lifetime. It has now become a classic introduction to Maori life. Its continued availability should help the reader to obtain a basic background to old time Maori life which can be extended by further reading.

MAORI RELIGION AND MYTHOLOGY PART 1
By Elsdon Best
National Museum Bulletin No. 10
424 p. 1976. $18
An account of the theory of the universe and its creation, religious beliefs, rites, magic, and folklore of the Maori people of New Zealand. First published in 1924, reprinted without textual alterations and retaining the original bulletin numbers. (Government Printer.)

MAORI STOREHOUSES AND KINDRED STRUCTURES
By Elsdon Best
116 p., illustrated. 1974 reprint. $6.50
As an authority on Maori culture, the author has compiled in this publication a comprehensive record on the use of the different storage structures, etc., used by the Maori in former times. By studying items pertaining to Maori technology it is hoped this will throw light upon many phases of the social life and customs hitherto unknown. This bulletin is No. 5 in the Dominion Museum Series.

MATERIALS FOR THE NEW ZEALAND POTTER
By J. C. Schofield (N.Z. Geological Survey)
D.S.I.R. Information Series No. 118
1977.
$3.75
Describes the sources of clays in the local countryside and how to understand their suitability for ceramic purposes. Summarizes the minimum geological knowledge necessary and the use of geological maps in determining the main types of clay minerals and their properties, the types of clays available in New Zealand and the available natural glazes, frits, and oxides. Contains an index and references.

NATIONAL INCOME AND EXPENDITURE 1974—75
$1
The national accounts record the value of goods and services produced by a community in a particular period and the way in which these are used. Within the accounts the flows of production and disposal of goods and incomes are analysed in ways to provide information on the inter-relationship between industrial and institutional sections of an economy and between an economy and the rest of the world.

MIRACLES FOR JOHN AND JANE CITIZEN
By James McGill Webb
Industrial Training Service—Department of Labour
48 p.
$1
As the name implies this book is written for use by the layman rather than the technician, the engineer, or the scientist. This book does not include conversion tables but rather relates to metric units and their use, comparisons of size and includes a wide range of metric information. How big is a litre? What is a kilopascal? When will I use a centimetre? What will I buy in kilograms? Why is New Zealand going metric? If these and similar questions are causing you concern this book will provide the answers.

MICROZONING FOR EARTHQUAKES EFFECTS IN WELLINGTON, NEW ZEALAND
61 p.
$8.50
This report on earthquake microzonation is aimed at dividing extensive areas of Wellington into smaller zones and is intended as a guide only to planning of future redevelopment. The detailed studies of local geology and soil investigations have resulted in an Earthquake Microzone Map of Wellington. This map accompanies this publication. This report is the first one of a series. Later it is the intention to microzone other areas in the same way.

MOA-HUNTER PERIOD OF MAORI CULTURE
Roger Duff—Canterbury Museum Bulletin No. 1
$17.50
This book deals with the most important site yet investigated and in its discussions it traverses most of the New Zealand archaeological field. A chance discovery in 1939 by a 13-year-old boy revealed the grave of a chief in the gravels of the Wairau boulder bank. The grave, a good example of the ancient chief, prone in its gravel grave, with skull directed towards the setting sun, spoke with more authority regarding his race than the chief of the grave, with skull directed towards the setting sun, spoke with more authority regarding his race than the detailed memories of Maori tradition.

Although scholarly and technical, the book sustains throughout the drama of this archaeological discovery, and recreates from the evidence of bone and stone the life of our first Polynesians in the Moa-hunter period of Maori culture.

Elsdon Best (1856-1931), who was a member of the staff of the then Dominion Museum from 1911 to 1931, made a notable contribution to the study of Maori ethnology. After a lifetime of experience, including many years in close contact with the Maoris of the Urewera, he spent the last 20 years of his life writing particularly of the social customs and beliefs of the Maori people. There is still a demand for the many monographs written by Elsdon Best and the following titles have been reprinted without alteration to the original text (National Museum):
