Bay of Islands Electric Power Board Electric Lines Licence 1979

PURSUANT to section 20 of the Electricity Act 1968, the Minister of Energy licences the Bay of Islands Electric Power Board to lay, construct, put up, place and use electric lines and to construct and use electric works for the transmission and supply of electricity within the Bay of Islands Electric Power Board Area of Supply as described in the Schedule hereto.

This licence is issued subject to the following conditions:

CONDITIONS

1. This licence may be cited as the Bay of Islands Electric Power Board Electric Lines Licence 1979.

2. The conditions directed to be implied in all licences by the Electrical Supply Regulations 1976, and the Electrical Wiring Regulations 1976, shall be incorporated herein and shall form part of this licence, except insofar as they may be inconsistent with the provisions of this licence.

3. The licence hereby conferred is subject to compliance by the Licensee with the Electrical Supply Regulations 1976, the Electrical Wiring Regulations 1976, the Radio Interference Regulations 1958, and with all regulations made in amendment thereof or in substitution therefore, except insofar as they may be inconsistent with the provisions of this licence.

4. Bulk supply at a nominal voltage of 33 000 volts and 11 000 volts shall be received from the Electricity Division of the Ministry of Energy's substations located near Kaikohe and Kaitaia, respectively, or from such other additional point or points of supply as may be arranged between the Minister of Energy and the licensee.

5. The system of supply shall be as described in paragraphs (a), (c), (d), (e), (f), and (j) of regulation 15 of the Electrical Supply Regulations 1976. The primary distribution voltages shall be 33 000 volts and 11 000 volts between phases in the case of the system described in paragraph (f), and 11 000 volts between conductors in the case of the system described in paragraph (e). The system of supply authorised under paragraph (j) shall be a single conductor earth return system and the primary distribution voltages shall be 11 000 volts and 6350 volts between the conductor and the earth and the use of this system shall be subject to such terms and conditions as are from time to time laid down by the General Manager of the Electricity Division of the Ministry of Energy. The secondary distribution voltage shall be 400 volts between phases and 230 volts between any phase and neutral in the case of the three-phase four-wire system of supply, and 460 volts between outer conductors and 230 volts between each outer conductor and the middle conductor in the case of the three-wire system of supply, and 230 volts between conductors in the case of the two-wire system of supply.
