NOTES FORMING PART OF THESE ACCOUNTS

1. Bases of Accounting
These accounts are prepared on an historical basis. The following significant accounting principles have been applied:

(a) Premiums and discounts on dated investments are amortised from the date of purchase to maturity on a straight line basis. Realised profits and losses on sales of investments are taken to profit and loss account in equal instalments over five years commencing with the year in which disposal takes place. As redeemable quoted investments are normally held to or near maturity, no provision is considered necessary for any difference between the book amounts and the market values of such individual stocks quoted below book amounts at the balance date, neither have any transfers been made from reserves or out of the current year's profits to write them down, apart from the amortisation of premium on stocks bought above par referred to above.

(b) Provision for taxation includes an appropriate adjustment for deferred taxation.

2. The market value of Government and local authority securities at 30th September 1978 was $101,397,000 (1977 $93,447,000).

3. There is a contingent liability for subsidies on home lay-by accounts.
