### Taxation—The charge for income tax is the amount of the tax liability in respect of the accounting profit for the year and includes both current and deferred tax. The liability for deferred taxation arises from items of income and expenditure being included in taxation calculations in periods different from those in which they are dealt with in the financial accounts. The significant timing differences relate to accrued interest income, discounts earned and premiums paid on Government Stock and depreciation. Commencing in 1975, the Bank has been providing for deferred taxation on accrued income over six years, however this procedure is now being accelerated according to available profits.

### Depreciation—Fixed assets are being depreciated on the straight-line method at rates which will write off the cost over their estimated useful lives. The principal rates are:

- Buildings: 3 percent to 5 percent
- Furniture and fittings: 10 percent to 20 percent
- Computer equipment: 20 percent to 25 percent

### Notes to the Accounts

#### 1. Statement of accounting policies—The general accounting principles recommended by the New Zealand Society of Accountants for the measurement and reporting of profits and losses under the historical cost method have been adopted in the preparation of these financial statements.

The following particular accounting policies which materially affect the measurement of profit and the financial position have been consistently applied:

GENERAL PUBLICATIONS

SHADOW OF THE LAND
By Ian Wards

422 p. 1968. $9

The title for this book was provided by Nopera Panakarero, a Kaiapai chief of much influence, who, in May 1840, believed that only the "shadow of the land" had gone to Queen Victoria whilst the substance remained with the Maoris. Less than a year later he revised this opinion convinced that only the "shadow" would be the Maori portion. The author examines the British acquisition of New Zealand, the Maoris, in the Treaty of Waitangi, and their confidence that its terms would be honoured and guaranteed the possession of their lands and ancient privileges.

It is under these circumstances that the book considers the use of military force in New Zealand, analyses the arguments surrounding the provision of troops and concludes that, beyond any reasonable doubt that there was never an attempt to govern by "moral suasion".

New Zealand followed the normal nineteenth century British pattern of territorial acquisition.

The book is an essential introduction to the Maori wars of a later date.

BETWEEN GOVERNMENTS AND BANKS
By Dr Hawke

244 p. $7.50

The author, with a combination of historical and economic skill, covers the story and makes an assessment of the Bank's performance to date. A valuable contribution to New Zealand's historical record.

DIRECTIONS FOR EDUCATIONAL DEVELOPMENT
A REPORT PREPARED BY THE ADVISORY COUNCIL ON EDUCATIONAL PLANNING
141 p. 1975. $2.50

This report marks the culmination of the activities of the Educational Development Conference. The Advisory Council has recommended the directions it considers New Zealand education should go in the next 5 or 10 years. Five principal areas are identified as requiring attention. Education is seen as a lifelong activity, and emphasis is therefore placed on the "foundational childhood" education, the school curriculum and special provisions for special needs, and parent education.

Special attention is given also to the relationship between the school curriculum and the need for close: support and co-operation, including understanding and respect for minority cultures.

A key to the quality of education is the people involved in it. Teacher education, the advice and ancillary staff, as well as resources for materials and research, have a chapter devoted to them.

Since education is seen as a lifelong activity, this is considered at some length. Facets such as accessibility, transfer of credits, and the role of existing institutions are discussed, together with ways in which continuing education could be provided for the whole community.

In discussing the administration and organisation of education the principle followed is the maximum devolution of authority and responsibility to the agencies and the community, as for instance, school committee and district level.

ECONOMICS OF THE NEW ZEALAND MAORI
By Raymond Firth

This book contains an account of the social and economic organisation of the Maori people before the organisation was transformed by contact with Western civilisation. It is a major scientific contribution to economic anthropology and has now become a standard work.

FOREST LORE OF THE MAORI
By Elsdon Best
DOMINION MUSEUM BULLETIN No. 14
$17.95
Printed without textual alteration, this bulletin provides an
important basis for any study of old-time Maori economies

interest today when first written, since it stresses so
fully the uses made by the Maori people of their natural
resources, and supplies basic materials for further studies in
ethnobotany and ethnozoology. The reverence which the old
time Maori showed towards natural resources mirrors the
modern concern for ecological principles.
