THE MAORI AS HE WAS
By Elsdon Best

Fifty years of public demand since this book was first published resulted in the need for reprints in 1934 and 1932. This text has changed but some of the ideas and concepts have been replaced with similar illustrations. There have been many advances in our knowledge of Maori life since this book first appeared. The work of numerous ethnologists, and more recently archaeologists, has critically examined many of the earlier concepts, confirming some, disproving others, and altering others to varying degrees. No one has yet produced a similar illustration of the Maori as he was. This book was first published when Best was 68 and thus represents the accumulated knowledge of a lifetime. It has now become a classic introduction to Maori life. Its continued availability should help the reader to obtain a basic background to old time Maori life which can be extended by further reading.

What is a kilopascal? When will I use a centimetre? What will I buy in kilograms? Why is New Zealand going metric? If these and similar questions are causing you concern this book will provide the answers.

MOA-HUNTER PERIOD OF MAORI CULTURE
ROGER DUFF—CANTERBURY MUSEUM BULLETIN No. 1
436 p. 3rd edition. 1977. $17.50

This book deals with the most important site yet investigated and in its discussions it traverses most of the New Zealand archaeological field.

A chance discovery in 1939 by a 13-year-old boy revealed the grave of a chief in the gravel of the Waipara boulder bank. The grave, goods, and bones of the ancient chief were in his gravel grave, with skull directed towards the setting sun, spoke with more authority regarding his race than the distorted memory or tradition.

Although scholarly and technical, the book sustains throughout the drama of this archaeological discovery, and receives from the evidence of bone and stone the life of our first Polynesians in the Moa-hunter period of Maori culture.

Elsdon Best (1856-1931), who was a member of the staff of the then Dominion Museum from 1911 to 1931, made a notable contribution to the study of Maori ethnology. Plants that are toxic if eaten, and touch irritants are dealt with in separate sections. A general instruction on what to do if poisoning occurs or is suspected is found at the beginning of the book for ready access in emergency.
