THE CHANGING VEGETATION OF MOLESWORTH STATION NEW ZEALAND 1944-1971
NEW ZEALAND DEPARTMENT OF SCIENTIFIC AND INDUSTRIAL RESEARCH BULLETIN 217
118 p. 1976. $4.50
Totalling 700 square miles, the broad expanse of high altitude Crown land known as Molesworth Station is the largest single farm unit in New Zealand. In 1938, after 70 years of leasehold farming the Molesworth and Tamdale runs reverted to the Crown in a badly depleted state. This is an account of the recovering of the land at Molesworth for productive farming and should prove very interesting and informative to all high country farmers.

CONSERVING NEW ZEALAND’S HERITAGE
By P. H. C. Lucas

In 1969 Mr Lucas went on a study tour of national parks and allied areas in Canada and the United States. On his return to New Zealand he wrote this report as a suggested guideline for national parks and reserves administrators. Many of the problems experienced by older countries could be avoided by a careful study of their mistakes and with this in mind Mr Lucas has concluded each section with a summary of lessons for New Zealand. Not only of interest to the general public, but also to park administrators and planners, tourist promoters, historians, and archaeologists.
