- C3. Free from living scale insects (Coccoidea) or has been effectively treated prior to shipment (name and dosage of treatment to be specified).
 - C4. Shipped in an unripe condition.
 - C5. Grown in a country where citrus canker (Xanthomonas citri) is not known to occur.
- C6. Grown and packed in an area not less than 80 kilometres (50 miles) from an area where any harmful species of fruit fly (family Tephritidae) exists.

 C7. Shipped in a condition showing not more than 25 percent colour from the basal end.
- C8. Grown in a State or Province where Sclerotinia (Monilinia) fructigena and Sclerotinia (Monilinia) laxa f. sp mali are not known to occur.

T-Treatments

Except where specified to the contrary, the following treatments are to be given before the produce arrives in New Zealand. The International Health Certificate is to be endorsed to the effect that the produce has been-

- T1. Subject to a cool-storage treatment (details on application).
- T2. Treated in an approved manner (details on application).
- T3. Fumigated with ethylene dibromide at appropriate rates before shipment.
- T4. Fumigated with methyl bromide at appropriate rates before shipment.

Notes—(a) Apples and pears may be imported from British Columbia and the western seaboard of U.S.A. subject to inspection on arrival and treatment if necessary. Apples from Nova Scotia are subject to a prior cool-storage treatment (details on application).

- (b) Avocado imports are approved from California only.

 (c) Trial shipments approved subject to conditions of prior permit to import obtainable from Officer in Charge, Plant Health and Diagnostic Station, Levin. See note 3 to the Schedule.
 (d) Mangoes from Mexico are also fumigated after arrival.

 - Treatment may be carried out after arrival.
- (f) Limited consignments may be imported from Niue Island through Christchurch during the winter months. Details on request from Regional Port Agriculture Officer, Ministry of Agriculture and Fisheries, Private Bag, Christchurch.
 - (g) In place of certificate 6, the fruit may be fumigated with ethylene dibromide at appropriate rates before export.
