INVESTMENT ISSUE

By Donald T. Brash, et al.

NEW ZEALAND PLANNING COUNCIL No. 16.

86 p. 1980. \$6.75 plus 70c p & p
Recently, investment has been very low, compared with that prevailing from the mid-1950s to the mid-1970s. If we are to take advantage of the opportunities for development before us, there will have to be a resurgence of fixed investment for the next few years. It is needed in plant, machinery, and equipment for the development of our energy resources.

Resulting from a major longitudinal study into the social adjustment of New Zealand boys, the following reports seek to answer the question: "To what extent is it possible to predict from specific information collected at the age of ten those boys who will later become delinquent or show other signs of maladjustments".

This discussion document comes at the start of a decade of significant national development and, hence, of changes in land use. "Land use" like "Energy" will be of key importance during the 1980s as New Zealand moves to diversify its primary production, develop its resources of minerals and energy, and conserve its flora and fauna.

LIVING LETTERS

STATE SERVICES COMMISSION

36 p. 1980 reprint. \$1.75 plus 45c p & p

One of the aims in letter writing is to get ideas across to the reader clearly and briefly. But do letters always say what is meant? Even if they are clear to the writer, will the reader understand them easily? If you are still using the old clichés of "acknowledging receipt of", "according to our records", and "enclosed please find" it is almost certainly time to change your attitude to writing living letters.

THE MAORI AS HE WAS

By Elsdon Best

295 p. 1974 reprint. \$6.50 plus 70c p & p

Fifty years of public demand since this book was first published resulted in the need for reprints in 1934 and 1952. The text has been reproduced unchanged but the originals of some of the figures could not be traced and these have been replaced with similar illustrations. There have been many advances in our knowledge of Maori life since this book first appeared. The work of numerous ethnologists, and more recently archaeologists, has critically examined many of the earlier concepts, confirming some, disproving others, and altering others to varying degrees. No one has yet produced a synthesis of the results of all this scholarship and there is still nothing as comprehensive as this book of Best's to give a general account of the Maori. This book was first published when Best was 68 and thus represents the accumulated knowledge of a lifetime. It has now become a classic introduction to Maori life. Its continued availability should help the reader to obtain a basic background to old time Maori life which can be extended by further reading.
