The Auditors' Report to the Trustees of the Southland Savings Bank and the Notes to the Accounts, which are attached, form part of and are to be read in conjunction with these financial statements.

Invercargill, 6th May 1981.

SOUTHLAND SAVINGS BANK

NOTES TO THE ACCOUNTS FOR THE YEAR ENDED 31 MARCH, 1981

1. Statement of Accounting Policies—The general accounting principles recommended by the New Zealand Society of Accountants for the measurement and reporting of results based on historic costs have been adopted in the preparation of these financial statements.

The particular accounting policies which the bank considers appropriate for the measurement and reporting of profit and financial position are detailed below:

New Zealand Government Stock

It is the normal policy of the Bank to hold Government Stock until maturity. On this basis, from 1 April 1980, the stock has been shown at face value less the unamortised discount on stock purchased at other than face value.

Prior to 1 April, 1980, Government stock was recorded at face value and the difference between the cost and face value transferred direct to the reserve fund.

In some cases, low yielding Government stock has been sold for tax purposes in sale and purchase arrangements and the stock purchased is shown at the cost of the original holding.

TAXATION

Provision for taxation charged against profits is the estimated expense relating to the results for the year.

Provision for deferred taxation relates to timing differences on accrued interest income, depreciation and profits and losses on the sale and purchase of New Zealand Government Stock.

DEPRECIATION

Depreciation has been calculated by applying Inland Revenue department rates, except for data processing equipment, which has been depreciated on a straightline basis. First year depreciation has been included where applicable.

The difference between the adopted policy and the straightline basis is not considered to be material.

The principal annual rates used are:

2. Government stock—New Zealand Government stock at 31 March, 1981:

				Ψ
Face value			 	41,296,722
Cost price			 	41,169,903
Estimated m	arket va	alue	 	33,873,580

It is the bank's policy to hold these investments until maturity date.

- 3. Deferred maintenance—A provision of \$200,000 has been made in the profit and loss account for the upgrading of the Don Street frontage of the Head Office Building. A firm commitment had not been made at 31 March, 1981. This amount is not allowable as a deduction for taxation until the expenditure has been incurred.
- 4. Deferred taxation—Deferred taxation arises because of timing differences in respect of the increase in interest accrued \$233,038, the sale of Government stock \$183,429, and depreciation \$1,559.
 - 5. Commitments at 31 March, 1981—
 - (a) Property, buildings and equipment .. \$315,000
 - (b) Mortgages, term loans and personal loans approved but not advanced ... \$2,543,673
