   (a) The specification to which the cylinder was manufactured.
   (b) The manufacturers name or mark, and the serial number of the cylinder.
   (c) The date of the original cylinder inspection and the identification mark of the inspection authority who made the inspection.
   (d) The date of any periodic cylinder test and the identification mark of the cylinder testing station who made each test.
   (e) The cylinder test pressure.
   (f) The charging pressure of the cylinder at 15°C.
   (g) The nominal water capacity of the cylinder.
   (h) The tare weight of the cylinder.
   (i) An identification that the cylinder is suitable for use with CNG.
2. That the cylinders be provided with valve threads of the form specified in British Standard BS 341 "Valve Fittings for Compressed Gas Cylinders".
3. That the cylinders be tested at periods not exceeding 5 years in accordance with the periodic test requirements laid down in the specification to which the cylinder was manufactured.
4. That the cylinder be provided with a cylinder shut off valve designed for a working pressure of 16.5 MPa and capable of withstanding the test pressure of the cylinder. Valuation of Assets—All current assets and investments are shown at cost with the exception of Government and local authority stock. On the basis that these will normally be held to maturity they have been valued at cost, adjusted by the amortisation of premiums or discounts on purchase, calculated on a yield basis, over the term of the stock. Stock purchased prior to 1 April 1980 has been included at face value.

In some cases, low yielding Government stock has been sold for tax purposes in sale and purchase arrangements and stock purchased is shown at the cost of the original holding.

Taxation—Provision for taxation charged against profits is the estimated expense relating to the results for the year.

Preference for deferred taxation relates to timing differences on accrued interest income, depreciation and profits and losses on the sale and purchase of New Zealand Government Stock.

Changes in Accounting Policies—Accounting policies have been changed to include an accrual for holiday pay due but unpaid at 31 March 1982. This has reduced the net profit after taxation by $77,550.

2. Provision for Deferred Maintenance—The amount provided in the 1981 accounts has yet to be expended. It is expected that this provision will be used in the current financial year or written back in the profit statement.

3. Deferred Taxation—Deferred taxation arises because of timing differences in respect of the increase in interest accrued but unpaid, the sale of Government Stock $458,616, and depreciation $28,235.

4. Government Stock—New Zealand Government stock held at 31 March:

- Face value $50,103,571
- Less unamortized premiums and discounts $7,135
- Book value $42,968,436

New Zealand Government Stock is held pursuant to the ratio requirements of the Trustee Savings Bank Act 1948 and subsequent amendments and under normal circumstances is held to maturity dates. During the 1982 year a parcel of Stock was sold at a loss with the proceeds reinvested to give the bank an improved return. The estimated market value of Government Stock at 31 March 1982 was $43,955,647 (1981 $33,873,580).
