LPG fuel cylinders are approved subject to the following conditions—

1. That they be permanently and clearly marked, either on a thickened portion of the cylinder or on a suitably attached metal plate, with characters not less than 6 mm high if space permits but in any case not less than 3 mm high, displaying the following information:

- The specification to which the cylinder was manufactured.
- The manufacturers name or mark, and the serial number of the cylinder.
- The date of the original cylinder inspection and the identification mark of the inspection authority who made the inspection.
- The date of any periodic cylinder test and the identification mark of the cylinder testing station who made each test.
- The cylinder test pressure.
- The nominal water capacity of the cylinder.
- The tare weight of the cylinder.
- An identification that the cylinder is suitable for use with LPG.

2. That they be provided with valves and fittings which provide the following functions—

- Filling connection incorporating a non-return valve.
- Service valve incorporating an excess flow valve.
- Contents gauge.
- Safety valve.
- A fixed liquid level indicator or an automatic fill shut off device which prevents the cylinder being filled beyond 85 percent of the total cylinder capacity.

Valves and fittings shall have a service pressure rating of at least that of the cylinder to which they are fitted and shall be dimensioned, threaded and marked in accordance with the requirements of Section 2.3 of New Zealand Standard NZS 5422 "The Use of LPG and CNG Fuels in Internal Combustion Engines—Part 1 LPG Fuel".

3. That the cylinders be tested at periods not exceeding 5 years in accordance with the periodic test requirements laid down in the specification to which the cylinder was manufactured.

Dated at Wellington this 11th day of May 1982.

T. A. LISTER, Senior Automotive Engineer.
