CORRIGENDUM
The Waimea East Irrigation District Order 1982

DAVID BEATTIE, Governor-General

ORDER IN COUNCIL

At the Government Buildings at Wellington this 17th day of May 1982

Present:

THE RIGHT HON. D. S. THOMSON PRESIDING IN COUNCIL

PURSUANT to section 208 of the Public Works Act 1981 and Part XIX of the Public Works Act 1981, His Excellency the Governor-General, acting by and with the advice and consent of the Executive Council, hereby makes the following order.

ORDER

1. This order may be cited as the Waimea East Irrigation Order 1982.

2. The area of land described in the First Schedule hereto is hereby constituted as an irrigation district to be known as the Waimea East Irrigation District (herein referred to as “the district”).
3. It is hereby declared that the annual basic charge payable in respect of irrigable land within the district shall be $135 per hectare and that the annual water availability charge per hectare in respect of water supplied shall be $155/water unit where a water unit is a flow rate of 1 cubic metre of water/hour.

4. The annual basic and water availability charges shall be reduced for the first 6 seasons of supply as set out in the Schedule below.

5. Basis of Allocation. Supply of water is subject to Crown Water Right No. 1232 and 1232A issued by the National Water and Soil Conservation Authority. The right provides for the development of underground water from the Waioeka River. The scheme will be capable of providing sufficient water to meet the design application rates of 38 mm/week for spray systems and 28 mm/week for trickle systems at all times over the whole irrigation district. It is anticipated that in dry seasons some rationing of water may be necessary. Water will be supplied at a pressure of approximately 320 kPa downstream of the farm gate flow controls which will limit the flow of water on to a property to that allocated under the water availability agreement. The agreement will be based on the requirements of an approved on-farm irrigation plan that will ensure a system capable of meeting the scheme design application rates. The agreement shall be in accordance with section 216 of the Public Works Act 1981. In seasons where rationing is required, the water availability charges may be reduced by the Minister of Works and Development for that season as allowed for in section 218 in the Act.

6. It is hereby declared that after the seventh season of water availability, the annual basic and water availability charges shall be subject to annual adjustment to compensate for any difference in any element of these charges from the amount previously estimated as stated under section 210 and 212 of the Public Works Act 1981.

7. It is hereby declared that 'land' in relation to any occupier or ratepayer in the irrigation district means all that land occupied by that person in the district which aggregates not less than 2 hectares.

FIRST SCHEDULE

By T. S. Winter
Ministry of Agriculture and Fisheries Bulletin 267
155 p. 1980 reprint, $8.95 plus 85c p & p
Though fundamental successful beekeeping is the same the world over, the varying seasonal conditions and the variety of nectar sources in different areas mean that the beekeeper must study local conditions and adjust his methods accordingly. Three factors govern success in beekeeping—locality, management, and the right strain of bees. This excellent book covers all aspects of beekeeping in text, photographs, and illustrations.

FISHING METHODS AND DEVICES OF THE MAORI
By Elsdon Best
National Museum Bulletin No. 12
264 p. $15.95 plus $1.50 p & p
Another in the series of the Best publications, it has been reprinted without revision so that the basic studies may be accessible in the original style.
This particular bulletin still remains the only comprehensive account of most aspects of Maori fishing. The descriptions of methods employed in fishing given here are still quite basic for any future studies in this field since no first-hand observations can now be made. The detailed fishing methods outlined are accompanied by descriptions of the artifacts used, together with associated chants, magic formulae, special observances, and fishing lore.

(Government Printer.)

THE MAORI AS HE WAS
By Elsdon Best
295 p. 1974 reprint $6.50 plus 85c p & p
Fifty years of public demand since this book was first published has resulted in the need for reprints in 1954 and 1972. The text has been reproduced unchanged but the originals of some of the figures could not be traced and these have been replaced with similar illustrations. There have been many advances in our knowledge of Maori life since this book first appeared. The work of numerous ethnologists, and more recently archaeologists, has critically examined many of the earlier concepts, confirming some, disproving others, and altering others to varying degrees. No one has yet produced a synthesis of the results of all this scholarship and there is still nothing as comprehensive as this book of Best’s to give a general account of the Maori. This book was first published when Best was 68 and thus represents the accumulated knowledge and experience that has now become a basis for a comprehensive view of Maori life. Its continued availability should help the reader to obtain a basic background to old time Maori life which can be extended by further reading.

MAORI

Moves on to the Maori today, finishing with the theme, one country, two heritages in unity. Well illustrated with 64 coloured photos, of interest to all New Zealanders and tourists. (Tourist and Publicity Department.)

MOA-HUNTER PERIOD OF MAORI CULTURE
Rogers Duff—CANTERBURY MUSEUM BULLETIN No. 1
436 p. 3rd edition, 1977. $17.50 plus $1.50 p & p
This book deals with the most important site yet investigated and in its discussion it traverses most of the New Zealand archaeological field.

A chance discovery in 1959 by a 13-year-old boy revealed the grave of a chief in the gravels of the Waitawhio boulder bank. The grave, goods, and bones of the ancient chief, prone in his grave, with skull directed towards the setting sun, spoke with more authority regarding his race than the distorted memories of Maori tradition.

Although scholarly and technical, the book sustains throughout the drama of this archaeological discovery, and recreates from the evidence of bone and stone the life of our first Polynesians in the Moa-hunter period of Maori culture.

FOREST LORE OF THE MAORI
By Elsdon Best
DOMINION MUSEUM BULLETIN No. 14
421 p. 1977 $17.95 plus $1.50 p & p
Printed without textual alteration, the work provides an important basis for any study of old-time Maori economics and perhaps more important of his attitude to what was a major part of his environment. It will be more of general interest today than when first written, since it stresses so fully the uses made by the Maori people of their natural resources, and supplies basic materials for further studies in ethnobotany and ethnozoology. The reverence which the old time Maori showed towards natural resources mirrors the modern concern for ecological principles.

NATIONAL PARKS OF NEW ZEALAND

Because of the popularity of this book it is expected this edition will be in great demand. In addition to the book being an ideal souvenir for the overseas visitor it makes an ideal gift and also a valuable asset to anyone’s home library.
