

3. It is hereby declared that the annual basic charge payable in respect of irrigable land within the district shall be \$135 per hectare and that the annual water availability charge payable in respect of water supplied shall be \$155/water unit where a water unit is a flow rate of 1 cubic metre of water/hour.

4. The annual basic and water availability charges shall be reduced for the first 6 seasons of supply as set out in the Second Schedule hereto.

5. Basis of Allocation. Supply of water is subject to Crown Water Right No. 1232 and 1232A issued by the National Water and Soil Conservation Authority. The right provides for the continuous taking of up to 700 litres per second from the Wairoa River. The scheme will generally be capable of providing sufficient water to meet the design application rates of 38 mm/week for spray systems and 28 mm/week for trickle systems at all times over the whole irrigation district. It is anticipated that in dry seasons some rationing of water may be necessary. Water will be supplied at a pressure of approximately 320 kPa downstream of the 'farm gate' flow controls which will limit the flow of water on to a property to that allocated under the water availability agreement. The agreement will be based on the requirements of an approved on-farm irrigation plan that will ensure a system capable of meeting the scheme design application rates. The agreement shall be in accordance with section 216 of the Public Works Act 1981. In seasons where rationing is required, the water availability charges may be reduced by the Minister of Works and Development for that season as allowed for in section 218 in the Act.

6. It is hereby declared that after the seventh season of water availability, the annual basic and water availability charges shall be subject to annual adjustment to compensate for any difference in any element of these charges from the amount previously estimated as stated under section 210 and 212 of the Public Works Act 1981.

7. It is hereby declared that 'land' in relation to any occupier or ratepayer in the irrigation district means all that land occupied by that person in the district which aggregates not less than 2 hectares.
