Exchange Rates

In terms of section 25 (2) of the Reserve Bank of New Zealand Act 1964, the Reserve Bank today released outer limits for rates of exchange to be used in transactions involving the conversion of New Zealand currency into foreign currencies and foreign currencies into New Zealand currency when delivery of the foreign currency dealt in will be effected by telegraphic transfer. The following range of rates, for the main currencies used by New Zealand traders in settling foreign exchange transactions, will remain in force until the instruments are purchased which do not entitle the buyer to foreign currency balances in the foreign centre until the instruments have been delivered at the foreign centre. In the latter case interest at foreign centre rates may be deducted from the telegraphic transfer rate to compensate the purchaser for his loss during the transit period.

NOTES TO THE ACCOUNTS

Note 1:

Accounting Policies

The accounting policies which the bank considers appropriate for the measurement of its results and financial position using the historical cost method, except for the revaluation of land and buildings, are as follows:

Recognition of income

Income shown in the profit and loss account is earned in the current year and includes the amortisation of premiums and discounts on the purchase of Government and local authority stock.

In the case of personal loans, the policy is to add interest to the advance at the commencement of the loan, and to bring this interest into revenue during the appropriate financial year in accordance with the 'Rule of 78'. Significant gains (or losses) on the sale of Government stock and local authority stock are reported separately in the profit statement.

Expenditure

Interest credited to depositors—Interest on savings and current accounts represents interest credited at 31 March and the interest paid on closed accounts during the year. Investment accounts which are credited with interest during the year have had an appropriate adjustment made for the interest accrued to 31 March.
Other expenses—Other expenses, including expenditure on computer programme development, are charged to the accounts in the year in which the expenditure is incurred.

Depreciation—Fixed assets, other than freehold land, are depreciated on a straight line basis at rates estimated to write off the cost less residual value over the useful life of each class of asset. The principal annual rates in use are:

<thead>
<tr>
<th>Asset Type</th>
<th>Annual Rate</th>

</thead>
<tbody>
<tr>
<td>Buildings</td>
<td>1 percent to 2.5 percent</td>
</tr>
<tr>
<td>Computer equipment, office furniture and motor vehicles</td>
<td>10 percent to 15 percent</td>
</tr>
</tbody>
</table>

As land and buildings were revalued as at 31 March 1983, depreciation, for the current year was charged on the same basis as in previous years.

Taxation—Taxation charged against profits for the year is the estimated expense for the year. Tax allocation accounting has been adopted by the bank for significant timing differences in respect of accrued investment income, depreciation, capital profits and losses, and amortisations of Government and local authority stock purchases and sales.

Valuation of Assets

Current assets and investments—All current assets and investments are shown at cost with the exception of Government and local authority stock. From 1 April 1980, stock has been valued at cost adjusted by the amortisation of the discount or premium on purchase, calculated on a yield basis, over the term of the stock. The discount or premium is calculated after adjusting for interest accrued in the purchase price. Government and local authority stock purchased prior to 1 April 1980 and still held at balance date is recorded at face value.

In certain circumstances low yielding Government stock has been realised for long term cash flow and profit advantage. Replacement stock purchased to maintain the required level of investment has been valued in line with the valuation policy adopted for the stock previously held.

Fixed assets—Fixed assets are shown at cost with the exception of land and buildings which are valued at 90 percent of an independent valuation.

Changes in Accounting Policies

Except for the revaluation of land and buildings there has been no change in the accounting policies this year.
