Statement of Accounting Policies—The general accounting principles for the measurement and reporting of profits and losses under the historical cost method adopted in the preparation of these financial statements. The following particular accounting policies which materially affect the measurement of profit and of financial position have been applied and are unchanged from last year.

Sale of Public Securities—Profit or losses realised on sale of public securities are reflected in the statement of profit in equal annual instalments over the unexpired period to maturity or five years, whichever is the shorter.

Taxation—Deferred taxation has been adopted to account for timing differences primarily in respect of public security interest income accrued but not paid.
