**Direction Not to Disclose Information**

**Pursuant to section 32 (4) of the Official Information Act 1982, a copy of a direction to the Director-General of the Post Office is hereby published for public information. The grounds for the direction and the source and purport of the advice on which it is based are set out in the direction.**

**POST OFFICE PACKET SWITCHING TENDER**

1. I have decided that the information sought by Mr P. W. Harpham on behalf of Progeni Systems Ltd., and recommended to be released by the Ombudsman pursuant to section 30 (2) of the Official Information Act 1982, namely two evaluation reports and a contract relating to a Post Office packet switching tender, should not be made available to him, and accordingly direct you pursuant to section 32(1)(a) of the Official Information Act 1982 not to disclose it.

2. The grounds for the direction are:

   (1)(a) The information sought contains information which was supplied in confidence to the Post Office by tenderers and relates to competitive commercial activities of those tenderers;
   
   (b) It is in the public interest that similar information continue to be supplied; and
   
   (c) The making available of the information could reasonably be expected to prejudice the supply of similar information.

3. The withholding of the information is necessary to maintain the effective conduct of public affairs through the free and frank expressions of opinions by officers of the Post Office, and there are no other considerations which render it desirable in the public interest to make that information available.

4. Access to information relating to Government tenders is governed by the Public Finance Act 1977, the Government Stores Regulations 1960 and the Government Stores Board Instructions. I have been advised and have concluded that on a proper construction of these provisions and of the Official Information Act 1982, the former provisions govern the proper response to the company's request and that these provisions do not authorise compliance with the request that has been made.

3. The advice on which this direction is based has been received from the Crown Law Office as to legal issues and from the Director-General of the Post Office as to factual issues. The purport of that advice is as set out above.

Dated at Wellington this 2nd day of July 1984.

Concessional CNG Fuel System Approvals

Pursuant to regulation 90e of the Traffic Regulations 1976* (as inserted by the Traffic Regulations 1976 Amendment No. 7) and pursuant to the powers delegated to me by the Secretary for Transport, I, Robert Norman Abram, Chief Automotive Engineer, hereby approve the CNG fuel cylinders listed in Schedule One hereunder for inclusion in any CNG fuel system installed and operated in accordance with the requirements of New Zealand Standard NZS 5422, Part 2, 1980 (and any standard made in amendment thereto or in substitution therefor) subject to the conditions set out in Schedule Two hereunder.

SCHEDULE 1

SCHEDULE 2

Conditions of Approval

1. That they be permanently and clearly marked, on a thickened portion of the cylinder, with characters not less than 6 mm high, if space permits, but in any case not less than 3 mm high, displaying the following information:
   (a) The specification to which the cylinder was manufactured.
   (b) The manufacturer’s name or mark and the serial number of the cylinder.
   (c) The date of the original cylinder inspection and the identification mark of the inspection authority who made the inspection.
   (d) The date of any periodic cylinder test and the identification mark of the cylinder testing station who made each test.
   (e) The cylinder test pressure.
   (f) The design charging pressure of the cylinder at 15°C.
   (g) The nominal water capacity of the cylinder.
   (h) Where required by the marking provisions of the specification to which the cylinder was manufactured, the tare weight of the cylinder.

2. That they be clearly marked or labelled to indicate that the cylinder is suitable for use with CNG.

3. That they be provided with valve threads of the type ¾-14 NPT and that each cylinder be supplied with a metal tag attached around the cylinder neck, between the cylinder and the cylinder valve, which identifies the valve thread type.

4. That they be provided with a cylinder shut off valve designed for a working pressure of 16.5 MPa and capable of withstanding the test pressure of the cylinder. Cylinder shut off valves shall be fitted with a handwheel to facilitate ease of opening and closing of the valve and shall be fitted with a pressure relief device, which remains in contact with the gas contained in the cylinder whether the handwheel is in the open or closed position, comprising of a burst disc backed by fusible alloy. The fusible alloy is to have a nominal yield temperature of 100°C centigrade and the burst disc shall yield at a pressure of not less than 24.75 MPa and not more than the test pressure of the cylinder. Cylinder valves shall be provided with an outlet thread of ½ in NPT (female) and a stem thread compatible with the cylinder neck thread.

5. That they shall not be charged with CNG to a greater pressure than 16.5 MPa at 15°C centigrade.

6. That they be tested at periods not exceeding 5 years in accordance with the requirements of Australian Standard AS 2337-1980 or in accordance with the periodic test requirements laid down in the specification to which the cylinder was manufactured.

NOTE: The effect of this notice is to allow the continued use in New Zealand of CNG fuel cylinders imported into New Zealand prior to the introduction of the Dangerous Goods (Class 2-Gases) Regulations 1980, and which were acceptable under previous dangerous goods requirements, but whose cylinder neck threads would disqualify them for general approval under the Traffic Regulations 1976. They are approved subject to the additional proviso that the cylinder valve thread type be clearly marked on a metal tag attached between the cylinder and the cylinder valve.

The terms of this approval do not allow the continued importation of such CNG fuel cylinders. Dated at Wellington this 5th day of July 1984.

R. N. Abram, Chief Automotive Engineer.
