## Notes to the Accounts

## 1. Statement of Accounting Policies-

1.1 General Accounting Policies

The going concern concept has been adopted in the preparation of these accounts, with historical cost as the measurement base.
Accrual accounting is used to match income and expenses.

### 1.2 Particular Accounting Policies

(a) Government Stock

Discounts and premiums on certain Government stocks are amortised from the date of purchase so that stocks will attain their redemption values by maturity date. The current years discount and premium amortisation is reflected in the profit statement.
(b) Personal Loans

The Bank's policy is to add interest to the advance at the commencement of the loan. The 'rule of 78 ' method of accounting for income is used to apportion the income between accounting periods. The effect of this method is that income earned over the term of the loan represents a level rate of return on the declining loan balance outstanding. The personal loan investment is net of unearned interest.
(c) Depreciation

Fixed assets are depreciated on the straight-line method at rates which will write off the cost over their estimated useful lives. The principal rates are:

$$
\begin{array}{ll}
\text { Furniture and fittings } \\
\text { Computer Eauioment } & 10 \% \text { to } 20 \% \\
20 \% \text { to } 25 \%
\end{array}
$$

(d) Taxation

The charge for income tax is the amount of the tax liability in respect of the accounting profit for the year and includes both current and deferred tax.

The liability for deferred taxation arises from items of income and expenditure being included in taxation calculations in periods different from those in which they are dealt with in the financial accounts. The significant timing differences relate to accrued interest income, discounts earned and premiums paid on Government Stock and depreciation.
1.3 Changes in Accounting Policies

There have been no changes in accounting policies. All policies have been applied on bases consistent with those used in prior years.
2. Investments-

Government stocks are recorded at cost adjusted by the discount or premium amortised to date. Stocks are generally held until maturity date and therefore, differences in the following bases of valuation have little financial effect on the Bank. Statutory ratio requirements are based on the nominal value of stocks.

|  | $\begin{gathered} 1984 \\ \$ \end{gathered}$ | $\begin{gathered} 1983 \\ \$ \end{gathered}$ |
| :---: | :---: | :---: |
| New Zealand Government Stock- |  |  |
| Cost price plus amortisation | 38,204,111 | 35,873,078 |
| Nominal value | 38,731,823 | 36,058,823 |
| Market value | 38,186,908 | 32,595,647 |

3. Fixed Assets-

|  | Cost | 1984 <br> Accumulated <br> Depreciation \$ | $\begin{gathered} \text { Book } \\ \text { Value } \\ \$ \end{gathered}$ | Cost <br> \$ | 1983 <br> Асситиlated Depreciation $\$$ | Book <br> Value <br> 8 |
