The Te Kauwhata Irrigation District Order 1984

DAVID BEATTIE, Governor-General

ORDER IN COUNCIL

At the Government House at Wellington this 30th day of April 1984.

Present:

HIS EXCELLENCY THE GOVERNOR-GENERAL IN COUNCIL

PURSUANT to section 208 of the Public Works Act 1981, His Excellency the Governor-General, acting by and with the advice and consent of the Executive Council, hereby makes the following order:

1. This order may be cited as the Te Kauwhata Irrigation District Order 1984.

2. The Minister of Works and Development is hereby authorised to construct, maintain and control water supply works described in the First Schedule hereto to serve the land described in the Second Schedule hereto. On completion of construction The Waikato County Council shall administer the scheme on behalf of the Minister.

3. The area of land described in the Second Schedule hereto is hereby constituted as an irrigation district, to be known as the Te Kauwhata Irrigation District (hereinafter referred to as "the district").

4. It is hereby declared that the annual basic charge payable on all irrigable land within the district shall be \$138.00 an irrigable hectare and the water availability charge shall be \$127.00 per 1000 m³ (thousand cubic metres). This is based on an average irrigation seasonal water requirement of 2660 m³ (cubic metres) per irrigable hectare. Water use in excess of 2660 m³ per irrigable hectare per season shall be defined as surplus water. The rate charged for the first 1240 m³ per irrigable hectare of surplus water will be the same as the ruling annual water availability charge for that irrigation season. Any additional surplus water in excess of 1240 m³ per irrigable hectare will be charged at a rate equal to 125% (one hundred and twenty-five percent) of the full ruling water availability charge for that irrigation season and is not subject to reductions during the first 6 seasons of supply. The rates charged for surplus water will be reviewed annually and if necessary adjusted accordingly. Reductions shall be made to annual basic charge and the water availability charge during the first 6 irrigation seasons so that the charges for the first 6 seasons of supply shall be as set out in the Third Schedule hereto.

5. It is hereby declared that on the commencement of water supply and from the end of the sixth season of water availability both annual basic and water availability charges may be adjusted annually to take into account variations between the estimated and actual construction costs, variations between estimated and actual costs of operation, maintenance and renewals, and variations in quantity of water or subject to availability agreements.

6. The charges payable shall be for a period of 20 consecutive seasons commencing at the start of the first year of supply for the scheme as determined and notified according to section 217 of the Act.

7. The supply of water will be subject to the water right granted by the Waikato Valley Authority in its capacity as the Regional Water Board. This right (No. 4467) is for up to 22 900 m³/day (twenty-two thousand nine hundred cubic metres per day) of water to be taken from the Waikato River at or about map reference NZMS1 N52 577945.

8. The irrigation season shall extend from 15 September to 30 April inclusive.

9. The minimum aggregate area of land occupied that shall be included in the irrigation scheme shall be 2 hectares.

FIRST SCHEDULE

WATER SUPPLY WORKS

THE Te Kauwhata Irrigation works by which means water can be drawn from the Waikato River by a piped water supply to a storage reservoir from which point the said water will be either gravity fed or pump reticulated to each property through a control valve as appropriate to enable trickle irrigation for horticultural plantings.

The said works include all reservoirs, electrical supply equipment, piping, gauges, boxes, valves, pumps, filters, meters and all other works incidental to or required for the construction, maintenance and control of the said works for the irrigation of the district.
