Note 1: Accounting Policies

General Accounting Policies

The following general accounting policies have been adopted by the Bank in the preparation of the financial statements:

- The historical cost basis is used, modified for the revaluation of land and buildings, and amortisation of government and local authority securities.
- Accrual accounting is used to match revenue and expenses.
- Reliance is placed on the fact that the Bank is a going concern.

Particular Accounting Policies

Recognition of Income

Income shown in the profit statement is earned in the current year and includes the amortisation of premiums and discounts on the purchase of government and local authority securities. In the case of personal loans, interest is added to the advance at the commencement of the loan and brought into revenue during the appropriate financial years in accordance with the ‘Rule of 78’.

Expenditure

Interest Credited to Depositors

Depositors' accounts which are credited with interest during the year have had an appropriate adjustment made for interest accrued to 31 March.
Other Expenses

Other expenses, including expenditure on computer program development, are charged to the accounts in the year in which the expenditure is incurred.

Depreciation

Fixed assets, other than freehold land, are depreciated on a straight line basis at rates estimated to write off the cost or revalued amount, less residual value, over the economic life of each class of asset.

The principal annual rates in use are:
Buildings—1 percent to 2 percent.
Computer equipment, office furniture and motor vehicles—10 percent to 15 percent.

Taxation

Taxation charged against profits for the year is the estimated expense for the year. Tax allocation accounting has been adopted by the Bank for significant timing differences in respect of accrued investment income, depreciation, capital profits and losses, and amortisations of government and local authority securities.

Valuation of Assets

Current Assets and Investments

All current assets and investments are shown at cost with the exception of government and local authority securities. Government and local authority securities are regarded as long term investments and redeemable at maturity at their face value. These securities are valued at cost, adjusted by the amortisation of the discount or premium calculated on a purchase yield basis over the term of the securities. The discount or premium is calculated after adjusting for interest accrued in the purchase price.

The realisable value of fixed interest securities fluctuates with the movement in market yields and it is customary for such fluctuations to be disregarded in the reporting of the results of the long term institutional investor.

Fixed Assets

Fixed assets are shown at cost less accumulated depreciation with the exception of revalued land and buildings which are shown at 90 percent of an independent valuations.

Changes in Accounting Policies

There have been no changes in the accounting policies this year.

The government guarantee of depositors' funds including accrued interest in terms of section 44 of the Trustee Banks Act 1983 and subsequent amendments was in force at balance date and continues to remain in force. However, the requirement to hold New Zealand government securities pursuant to the same Act was removed on 11 February 1985.

Freehold land and buildings were written up to 90 percent of independent registered valuations as at 31 March 1985. Other capital work in progress and leasehold properties are shown at cost.

The Bank’s share of a property under development was last year recorded in the cost of buildings. This year the completed project is included with other investments.

The latest government valuations of land and buildings dated from 1 July 1981, plus subsequent additions at cost, amount of $5,743,308 (1984, $6,330,000).

Capital commitments outstanding at 31 March 1985 amount to $187,000 (1984, $217,000).

NOTE 5: Taxation

There is no taxation liability in respect of the current year. The charge for deferred taxation $727,212 consists of taxation payable in future years on timing differences arising through the amortisation and sale of government securities $913,701 and the increase in interest accrued $459,073 and other items $382 less the effect of available tax credits earned forward $646,144.
A frontage of the northern side of Spring Street near the intersection of Spring Street and The Strand comprising the present right of way to the land in certificate of title Act 1981. A service lane in this place is essential for town planning.

In our opinion, the financial statements on pages 1 to 7 give, using the historical cost method modified by the revaluation of land and buildings, a true and fair view of the financial position of the Bank at 31 March 1985 and the results of its operations and the source and application of funds for the year ending on that date.

In our opinion proper accounting records have been kept by the Bank so far as appears from our examinations of those records. This statement forms part of the financial statements.
