The "normal" refers to the present site of the instruments. Standard period for normals is 1951-1980. No normals are available for stations with only short records.  
 \*Indicates that the sunshine recorder is not located at the station but is in the near vicinity.  
 A rainy day is a day with rainfall equal to or greater than 0.1 mm.  
 Where the extremes of temperature and rainfall have occurred more than once during the month, the date of the first occurrence is given.
