

tender numbers 4892 and 4893 are valid for the 1986 calendar year and will expire on 31 December 1986.

7. Licences will not be extended except in very exceptional circumstances.

CONTINUITY LICENCE

8. All licences won in this tender round, with the exception of tender numbers 4892 and 4893, carry the right to continuity licence for the 1987/88 licensing year. Continuity licence is available subject to the qualifying conditions as detailed in the Guide To Global Import Licence Tendering.

9. NO continuity licences will be available for licences won under tender numbers 4892 and 4893.

RULES OF ORIGIN

10. ANZCERTA import licences may only be used to import goods of Australian origin. The rules of origin for Australian goods are contained in the Customs Regulations 1968, as amended, and in Article 3 of the ANZCER Trade Agreement.

CLASSIFICATION OF GOODS

11. Tenders are by Import Licensing Schedule item code classifications. In some cases item codes are split into two or more tender numbers or combined with other item codes into one tender number. A brief description of the goods being tendered is given to assist tenderers but is not intended to be definitive. For a full identification of the goods concerned tenderers should refer to the Import Licensing Schedule and the Customs Tariff and should consult the Department of Trade and Industry or the Customs Department. It is the responsibility of the tenderer to confirm the correct classification of the good he or she wishes to import.

12. Some item codes contain tariff items that are exempt from the requirements of import licences, or are subject to licence on demand, when of Australian origin. Both categories are detailed in the Import Licensing Schedule. TEALs can not be used for these goods. No licence is required to import exempt goods. Licences for goods subject to licensing on demand are issued on application to the Collector of Customs.

13. The Import Licensing Schedule provides in some item codes that licences will be endorsed as not available for some goods in that item code (of a type made in New Zealand). These endorsements do not apply to ANZCERTA Licences. TEALs may be used to import these goods. All exclusions from the item code coverage applying to ANZCERTA licences are detailed in full as part of the brief description given here (and will be printed on licences when issued).

FUTURE LICENSING EXEMPTIONS

14. As a result of proposed ANZCERTA exemptions it is possible that some of the item codes tendered in this round may have moved to exempt licence for goods of Australian origin by 1 July 1986. Where this is the case any premiums due will be cancelled and any premiums already paid will be refunded.

OTHER STATUTES AND REGULATIONS

15. The granting of an import licence does not relieve the licence holder of any responsibility to meet the requirements of other statutes, regulations, standards, etc. Tenderers should be conversant with the requirements for the importation and sale of goods being tendered.

MOTOR VEHICLES AND COMPONENTS

16. Access arrangements for most motor vehicles and parts for motor vehicles are provided for by the Motor Vehicle Industry Plan. ANZCERTA TEALs cannot be used to import these goods. Licences for item codes in which motor vehicles parts fall will have their product coverage endorsed 'excluding those of a kind commonly used with the vehicles specified in appendix B attached'. A copy of Appendix B will be attached to relevant
