Pursuant to subsection (3) of section 23 of the Standards Act 1965, notice is hereby given that the following draft New Zealand standard specification is being circulated.

Number and Title of Specification

DZ 4203: General structural design and design loadings for buildings. $11.20

This draft is the proposed revision of NZS 4203:1984. In the preparation of the draft, many individuals and institutions with specialist skills and experience were canvassed for their views and for contributions to the work.

Part D, dealing with wind forces, is not yet available. It will be modelled largely on the new Australian draft which has been written to replace the Australian Code for Wind Forces, AS 1170:Part 2. Drafting of this section of the Standard will commence shortly.

The draft requires designers to consider two limit states, serviceability and ultimate, with appropriate load factors specified for each. The load factors for the ultimate state are smaller than New Zealand designers are accustomed to, and definitions of some loadings have been altered. These changes should make design appraisals more realistic. They follow trends in other countries, notably in Canada and the United States of America, but studies to support them have been made in New Zealand. To make the design process properly consistent throughout, changes will be needed in materials codes.
All persons who may be affected by this publication and who desire to comment thereon, may obtain copies at the price shown, from the Standards Association of New Zealand, Wellington Trade Centre, 181-187 Victoria Street (formerly known as 15-23 Sturdee Street) (or Private Bag), Wellington and installed only in accordance with NZS 7643.

NOTE—Payment must accompany all requests for drafts.

The closing date for the receipt of comment is 28 November 1986.

Dated at Wellington this 13th day of June 1986.

DZ 7649 Unplasticised PVC sewer and drain pipes and fittings

$6.00

This draft Standard is a proposed revision and extension of NZS 7649:1974 Unplasticised PVC underground drain pipes and fittings. It specifies the requirements for unplasticised polyvinyl chloride (UPVC) sewer and drain pipes and fittings for sewage, stormwater and waste water applications, suitable for use below ground or above ground where not exposed to direct sunlight.

Pipes for sub-soil drainage are specified separately in NZS 7650.
