Notes to the Financial Statements Year Ended 30th September 1986

1. Statement of Accounting Policies-

General Accounting Policies—The measurement base adopted is that of historical cost. Reliance is placed on the fact that the company is a going concern.

Accrual accounting is used to match expenses and revenues.

Significant Particular Accounting Policies—

Consolidation—

Group Accounts have not been prepared as the Directors are of the opinion that the expense of preparation would be out of proportion to the value to the members of the company.

Valuation of Investments-

New Zealand public securities are valued at cost adjusted annually for the proportion of discount or premium on purchase so as to allow redemption value by maturity date.

Whilst in the ordinary course of business some realisation of New Zealand public securities may take place at prices below book values, in the majority of cases these securities are held to, or close to maturity dates when they would be redeemed at face value. Accordingly, no provision is made for any difference between book value and market value of individual securities.

Sale of Public Securities-

Profit or losses realised on sale of public securities are reflected in the statement of profit in equal annual instalments over the unexpired period to maturity or 5 years, whichever is the shorter.

Taxation-

The liability method of interperiod tax allocation has been applied primarily in respect of public security interest income.

Changes in Accounting Policies—There have been no changes in accounting policies. All policies have been applied on bases consistent with those used in previous years.

2. New Zealand Public Securities

Book, redemption and market value of these securities at 30 September were:

						\$000	\$000
Book	 	 	 	 	 	68,819 60,155	72,157 72,70 4
