Schedule

Formula for Calculation of Amount of Anti-Dumping Duty

The anti-dumping duty to be charged, collected and paid pursuant to this notice shall be, in respect of each importation of the goods, the lesser of the amounts A and B calculated in accordance with the following formulae:

$$A = [(RSP \times 1.05) + \$NZ145] - \text{Export Price}$$

$$B = \text{Normal Value} - \text{Export Price}$$

where—

"RSP" is the Raw Sugar Price per tonne, to be established as at the London time of sale of the imported refined sugar, and being:

(a) The London Daily Price for raw sugar established on a cost/insurance/freight (CIF) basis each London market day as published by the London Futures and Options Exchange; and

(b) Converted to a Free on Board and Stowed (FOBS) basis by deducting the Caribbean/UK freight rate set for that day as published by the London Futures and Options Exchange; and

"Export Price" is the price paid or payable per tonne of the imported sugar;

"Normal Value" in relation to refined sugar imported from one of the countries listed below, is the value listed beside the name of that country:

Country of Origin	Normal Value
Belgium	US\$747 per tonne
Denmark	US\$824 per tonne
The Netherlands	US\$741 per tonne

Where either formula specified above yields a value for A or B of zero or less then no anti-dumping duty is payable.

Note

All amounts expressed in units of currency other than New Zealand dollars shall be converted to New Zealand dollars for the purposes of applying this formula (for example, the Raw Sugar Price is quoted in US dollars per tonne). The exchange rate applicable for converting any such unit of currency into NZ Dollars shall be the rate, as gazetted by the New Zealand Customs Department in the appropriate Customs Exchange Rate Notice, applying at the London time of sale.
