5.3.2 Additional Charges for SKYSTREAM Delivery

There are 2 International Service Access Points for SKYSTREAM. These are located within the Auckland and Wellington tariff zones. The charges listed in 5.3.1 include the price of a local access circuit from either of the 2 International Service Access Points to the customer’s first service-delivery point within the Auckland or Wellington tariff zone. Customers who require circuits to points outside of these two tariff zones, or to additional points within the tariff zones, will be charged standard Digital Data Service (DDS) access and transmission charges for these circuits.

5.4 TASTREAM SERVICE (DIGITAL CABLE SERVICE TO AUSTRALIA)

TASTREAM Service is a digital cable service that gives full-time operation over point-to-point circuits to Australia. It provides a half-circuit that gives full-duplex operation.

Note:
A “half” circuit originates at a customer’s service-delivery point(s) in New Zealand and connects, at a point of electrical interface, with transmission facilities provided by an overseas telecommunications organisation (which has an agreement with Telecom to connect the circuit to an overseas destination).
