TELECOMMUNICATIONS
(DISCLOSURE)
REGULATIONS 1990
This publication sets out the material required to be published by Telecom in the New Zealand Gazette by The Telecommunications (Disclosure) Regulations 1990.

The information herein describes the prices, terms and conditions of supply relating to prescribed services at the end of the quarter ending on the 31st day of December 1990. The Corporation has not published all information relating to prescribed services if the relevant prices, terms and conditions are identical in all material respects to those applying at the end of the immediately preceding quarter and which have already been published. The respective changes to prices, terms and conditions of supply set out herein are in **bold italic type**. The information is not intended by Telecom to constitute an offer of services to the public as the prices, terms and conditions of supply set out herein may change without notice. This information is also available on request at the following principal offices of the Corporation and its subsidiaries:

Telecom Corporation of New Zealand Limited, Telecom House, 13-27 Manners Street, P O Box 570, Wellington.

Telecom Auckland Limited, Telecom Tower, 16 Kingston Street, Private Bag, Auckland 1.

Telecom Central Limited, Regional Office, 5th Floor, Housing Corporation Building, 500 Victoria Street, Private Bag 3100, Hamilton.

Telecom Wellington Limited, 9th Floor, Hewlett-Packard Building, 186-190 Willis Street, P O Box 293, Wellington.

Telecom South Limited, 5th Floor, NML Building, 152-156 Hereford Street, P O Box 1473, Christchurch.

Detailed information on current national call (toll) charges, incorporating amendments to such information published at the end of the quarter ending the 30th day of September 1990, may be inspected or purchased at the principal offices of the Corporation at Auckland, Hamilton, Wellington and Christchurch.

The information in this publication was prepared by Telecom Corporation of New Zealand Limited after making all reasonable inquiry and to the best of the knowledge of the Corporation complies with the requirements of Regulation 4 of The Telecommunications (Disclosure) Regulations 1990.

Except for Permit to Connect Specification charges, payphone charges and the charging steps in the two toll call maps, all charges EXCLUDE GST.

</tbody>
</table>

Notes:
- Local Call rates apply to calls between telephone offices on Great Barrier Island.
- All times are New Zealand local time.

1.2 Message Rate Station Service

This applies only to Great Barrier Island.

Monthly charge .................................................................................................................................... $8.70
plus local call rates for calls between telephone offices.
### 1.3 Telecom International Call (Toll) Charges

The following charges apply to calls outside New Zealand.

#### Direct Dialling

Economy rates do not apply where calls are connected by the Operator.

Notes:

- Area 1 countries are: Adelie Terre, Australia, Australian Antarctic Bases, Christmas Island, Cocos Island, Cook Islands, Fiji, Kiribati, Nauru, New Caledonia, Niue, Norfolk Island, Papua New Guinea, Pitcairn Island, Solomon Islands, Tahiti, Tonga, Tuvalu, Vanuatu, Wallis and Futuna Islands, Western Samoa, American Samoa.

- Area 2 countries are: all other countries.

- INMARSAT refers to calls made through International Maritime Satellite.

- The price for the first minute of a national or international call from a Coinphone 3001 payphone includes a $0.20 flagfall charge.
2. NATIONAL LEASED-CIRCUIT SERVICES

2.1 Leased-Circuit Charges - General Principles

Charges for dedicated leased services are based on the following 4 principles:

• A once-only installation charge on application.
• Monthly access charges per end of circuit within a local exchange area.
• Monthly kilometre charges associated with transmission routes or junction routes. All junction routes are rounded up to the nearest kilometre for charging purposes.
• Charges associated with altering, reconfiguring or moving circuits at the customer's request.

2.2 Monthly Transmission Charges for Analogue Leased Circuits

Transmission charges for analogue leased circuits are a combination of the Step A to Step E rates which were detailed in section 4.1.3 of the supplement to the Gazette of Thursday, 25 October 1990, Issue No. 188. In general, this means:

• Junction charges apply to circuits or portions of circuits between exchanges in a local-calling area.
• Step A rates apply to circuits or portions of circuits between local calling areas within a Tariff Zone
• Step B to Step E rates apply to circuits or portions of circuits between Tariff Zones

Digital Leased Circuit Services

Upgrade from analogue access to digital access.......................................................... No charge

• Change of speed between 2.4 kbit/s, 4.8 kbit/s and 9.6 kbit/s per circuit for circuits with solely digital access .................................................. $150.00
• Change of speed between 2.4 kbit/s, 4.8 kbit/s and 9.6 kbit/s, per end of circuit for circuits with analogue access.................................................. $150.00

2.3 Megalink Service

Megalink is an unmanaged digital transmission service offering a 2 Mbit/s circuit. This is equivalent to thirty-two 64 kbit/s channels.

Monthly Access Charges

The monthly access charge is not based on the length of the access circuit.

• Access charge per end of link.................................................................$2850.00

2.4 International Leased Circuit Charges

Analogue Voice/Data Circuit Service

Auckland is the New Zealand point of entry for analogue leased circuits. Extension from Auckland to the customer's first service distribution point is free of charge. The first service distribution point is defined as the nearest location to Auckland at which the customer has access to the international circuit. Connection from this location to any additional customer service-delivery points (that is, for multipoint operation) within New Zealand will be charged at the standard national analogue leased-circuit rental (see section 4 of the supplement to the Gazette of Thursday, 25 October 1990).

The analogue service provided by Telecom is a full-duplex, 4-wire half circuit, operating to CCITT Rec. M1020 or CCITT Rec. M1040.
CCITT Recommendation M1040 details the characteristics of an ordinary-quality international leased circuit.

A "half" circuit originates at a customer's service-delivery point(s) in New Zealand and connects, at a point of electrical interface, with transmission facilities provided by an overseas telecommunications organisation (which has an agreement with Telecom to connect the circuit to an overseas destination).

2.5 TASTREAM Service (Digital Cable service to Australia)

TASTREAM Service is a digital cable service that gives full-time operation over point-to-point circuits to Australia. It provides a half-circuit that gives full-duplex operation.

Note:
A "half" circuit originates at a customer's service-delivery point(s) in New Zealand and connects, at a point of electrical interface, with transmission facilities provided by an overseas telecommunications organisation (which has an agreement with Telecom to connect the circuit to an overseas destination).

### Installation Charges

- Charge for installation of a 2.4 kbit/s circuit................................. $600.00
- Charge for installation of a 4.8 kbit/s circuit................................. $600.00
- Charge for installation of a 9.6 kbit/s circuit................................. $600.00
- Charge for installation of a 19.2 kbit/s circuit.............................. $1500.00
- Charge for installation of a 48 kbit/s circuit................................. $2500.00
- Charge for installation of a 56 kbit/s circuit................................. $4000.00
- Charge for installation of a 64 kbit/s circuit................................. $4000.00
- Charge for installation of a 128 kbit/s circuit............................... $5000.00
- Charge for installation of a 192 kbit/s circuit............................... $5000.00
- Charge for installation of a 256 kbit/s circuit............................... $5000.00
- Charge for installation of a 384 kbit/s circuit............................... $5000.00

The charge for upgrading a circuit to a higher rate is half the appropriate installation charge for the higher rate.

2.6 International Leased-Circuit Services

In certain cases the prices of international services are only ascertainable on application. This is because the charge for a particular service depends on the specific destination for the customer service required. Access to any destination may require a unique combination of telecommunications facilities, some of which will be owned and operated by Telecom, and some of which may be owned by an Overseas Telecommunications Company, for which Telecom would incur usage charges.

2.7 Installation Charges

Installation charges will apply to all work on a customer's property required to provide them with service. Installation charges will apply to the lead in and to any premises wiring that is required solely to serve the customer. Charges are assessed by the Telecom Regional Operating Companies on a case by case basis, depending on the applicable costs. Such costs include the relevant labour costs, travelling time, the time actually taken for the installation, equipment used and the materials required for the installation.

4. Interconnection

There is a non-refundable administration fee of $50,000 (excluding GST) payable to Telecom before a service operator may enter into negotiations for interconnection. This fee is applicable to any service operator commencing such negotiations after 31 July 1990.
Corrigendum

Delete the following sentence from clause 16 of the Interconnection contract on page 4116 of the New Zealand Gazette of Thursday 25 October 1990:

"Subject to Clause 16.7, in the event that a Telecom ROC wishes to make any alteration to that Telecom ROC's Network which makes it necessary for changes to be made to the Service Operator's Network, the Principal ROC shall serve on the Service Operator the following notices at the following intervals and times:"

and replace it with the following sentence:

"In the event that a Telecom ROC wishes to make any alteration to that Telecom ROC's Network which makes it necessary for changes to be made to the Service Operator's Network, the Principal ROC shall serve on the Service Operator the following notices at the following intervals and times:"

5. New Prices, Terms and Conditions

Telecom has announced and from time to time will announce its intention to introduce new prescribed services and changes to prices, terms and conditions of existing prescribed services, in 1991. Details of these will be published in accordance with the Telecommunications (Disclosure) Regulations 1990 within 30 days after the end of the quarter when they were introduced.
