Schedule

Terms, Conditions and Restrictions Applying to Citizen Radio Station Licences and to Citizen Radio Apparatus Licences

1. The licence permits the use of radio apparatus for the conduct of Radiocommunication in the Citizen Radio Service, within New Zealand, with base and mobile apparatus.

2. The apparatus, to which the licence relates, must be type approved or type accepted (Certificate of Compliance) and maintained to a specification issued by the Secretary and stated on the licence.

3. Nothing in the licence, the International Radio Regulations 1982, the Radiocommunications Act 1989, or the Radio Regulations 1987 prohibits any person in distress from using any means at that person's disposal to attract attention, indicate the person's position, and obtain assistance.

4. The apparatus, to which the licence relates, shall operate only on the frequency(ies), emission(s), and power(s) shown on the licence for the purpose specified on or annexed to the licence.

5. All reasonable care has been used in making radio frequency assignments. The nature of frequency assignments is such that no guarantee can be made that implementation and use will be trouble free. Accordingly, the Crown does not accept liability under any circumstances for any loss or damage of any kind. In the event that a frequency change is required, all costs are the sole responsibility of the licence.

6. The licence is valid for the period specified on the front of the licence. The licence may be revalidated upon payment of the prescribed fee as set out in the Third Schedule of the Radio Regulations 1987.

7. There is no restriction on the type of antenna that may be used but should interference occur, the provisions of Radio Regulation 39 will be enforced, i.e., the Secretary may require the person operating the interfering equipment to cease operating the equipment or to modify the operation of the equipment to prevent the interference.
